Inland Fisheries - Satish Chander Agarwal 2021-02-15

In all the developing countries, the vast natural resource have great potentials for the production of fish. Natural water resource are categorized on the basis of altitude, temperature and salinity. The different fish species have adopted as per water ecosystem. Out of identified about 22000 fish species, only 10% belongs to freshwater. Only 107 species have been found suitable as culturable. Hence, major chunk of fish are not cultured by man but used by him as food or other uses. It is therefore, the natural fisheries is very important for human being and proper management and legislation are needed to have the sustainable production. The text of the book is written in simple language so as understandable by scientists, extension workers, students and farmers. References and literature for further reading have been given in the end. Note: T&F does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

APPEAR - »Austrian Partnership Programme in Higher Education and Research for Development« - wird von der Österreichischen Entwicklungszusammenarbeit finanziert und fördert Kooperationen in den Bereichen Lehre, Forschung und Management zwischen österreichischen Hochschulen und Universitäten, bzw.

wissenschaftlichen Einrichtungen in insgesamt 13 Partnerländern.

APPEAR ist nicht an einseitigem Wissenstransfer interessiert, sondern schafft transdisziplinäre und transnationale Räume des Lernens und gemeinsamen Forschens. Im Rahmen des seit 2009 laufenden

Programmes wurden bislang 17 akademische Partnerschaften in lateinamerikanischen und afrikanischen Ländern; bzw. in Nepal realisiert, die in dem Reader vorgestellt werden. Dabei zeigen sich spannende Möglichkeiten partizipativer und transkultureller

Wissensproduktion, die insbesondere auch für nachhaltige

Entwicklungswege in den betroffenen Ländern von hoher Relevanz ist.

Collaboration, Communities and Competitiveness Samuel Dent 2017-08-25

Higher Education providers face enormous challenges in an increasingly competitive and globalised environment. It is perhaps obvious to those

engaged in teaching and research that academia is both a competitive and a collaborative endeavour. Many national systems now assume in their legal or governance frameworks competitive rather than co-

operative behaviour and increasingly regulate based on that assumption.

Institutional leaders and educators wrestle with the issues around the commoditisation of learning and the pressure to treat students as

customers. In tandem, students themselves are experiencing cuts in

public financing and a transfer of the cost burden to them as the

perceived private beneficiaries of a product. This book asks whether

there is an alternative approach to this now transnational competitive

logic. Can collaboration and partnership (re-)emerge as an antidote to

the consumerist and competitive approaches taken by governments

toward regulating their higher education systems? The question of

competition, collaboration and community is addressed here at three

levels of analysis. The macro-level or the international system level,

observes competition and collaboration between countries and between

institutions. The meso-level, includes competition and collaboration

between academics and students, and at inter- and intra-disciplinary

levels across organisational boundaries. Finally, competition and

collaboration at the micro-level considers the interface between

individual academics, and between academics and students as learners.
