Law Made Simple - David Barker 2014-04-03

Are you studying for an A-Level in Law? Are you thinking about reading Law or a related subject at university? Or maybe you already have a place at Law School? If you answered 'yes' to any of the above or if you have a general interest in how the Law works, Law Made Simple is the perfect introduction to this huge and complex subject. Covering all the foundation subjects, Contract, Torts, Land, Trusts, Criminal, Public and EU Law as well as an introduction to the personnel and mechanisms that make up the English Legal System, Law Made Simple will offer you a clear and concise introduction to both the legislation and case law relating to all the major topics. This 13th edition now includes a brand new chapter on Public Law and Human Rights, a completely revised and updated chapter on Sources of Law and has been fully updated to take into account developments across the curriculum such as the ratification of the Lisbon Treaty; the Supreme Court and the Ministry of Justice; the Legal Services Act 2007; and the Fixed Term Parliaments Act 2011.

Ethical Issues and Citizen Rights in the Era of Digital Government Surveillance - Cropf, Robert A. 2016-02-02

Questions surrounding the concept of freedom versus security have intensified in recent years due to the rise of new technologies. The increased governmental use of technology for data collection now poses a threat to citizens' privacy and is drawing new ethical concerns. Ethical Issues and Citizen Rights in the Era of Digital Government Surveillance focuses on the risks presented by the usage of surveillance technology in the virtual public sphere and how such practices have called for a re-examination of what limits should be imposed. Highlighting international perspectives and theoretical frameworks relating to privacy concerns, this book is a pivotal reference source for researchers, professionals, and upper-level students within the e-governance realm.

The NEC4 Engineering and Construction Contract Brian Eggleston 2019-03-01

The authoritative guide to the NEC4 Engineering and Construction Contract The New Engineering Contract (NEC) is one of the leading standard forms of contract for major construction and infrastructure projects. The latest edition of the contract (NEC4) is now a suite of contracts widely used in the UK, Australia, Hong Kong, South Africa, Ireland, and New Zealand. This timely and important book provides a detailed commentary on the latest edition of the main NEC4 Engineering and Construction Contract (NEC4 ECC) form. It explains how the contract is intended to operate and examines each clause to consider its application and legal interpretation. It also draws upon the author's highly successful third edition of the book covering the previous contract. It identifies and comments on the changes between the current and previous version of the form. After a brief introduction to the new edition of the form, The NEC4 Engineering and Construction Contract offers in-depth chapters covering everything from main options and secondary option clauses to risk assurances and NEC 4 family contracts. In between, readers will learn about general core clauses, the obligations and responsibilities of the contractor, testing and defects, payments, compensation events, and much more. Covers the latest version of the NEC Engineering and Construction Contract, the leading standard form contract for major construction projects Examines the new contract clause by clause and compares it with the previous edition Previous editions were widely acknowledged as detailed and fair analyses of the NEC contracts Written by a highly regarded contracts commentator,

Evolution and Adaptation Jean Kalicki 2019-12-17

What is it about international arbitration that makes it so open to evolution and adaptation? What are the main pressure points today and the unmet needs of stakeholders? What are the opportunities for expansion to new sectors and new audiences? What are the drivers for change, the obstacles and the risks? And equally important, what are the core principles that should never be lost? These were the topics of the Twenty-Fourth ICCA Congress, held in Sydney, Australia, in April 2018, the proceedings of which are collected in this volume. The volume highlights arbitration as a 'living organism' that has adapted in the past to various challenges, and that today - under attack from various quarters - might need to demonstrate its adaptability again. Accordingly, the contributions address the evolving needs of users, the impact of the rapidly changing face of technology, the expectations of the public, and the convergence and divergence of different aspects of legal traditions and cultures. Topical issues of interest for practitioners, academics, and students of arbitration include the following: legitimacy and authority of arbitrators, institutions and professional organizations to act as lawmakers; investment treaty reform, with particular reference to the definition of 'investment,' the evolution of substantive treaty standards, and sustainable development obligations; commercial arbitration reform, including issues of public and private interest, the development of common law, and cost, delay and transparency concerns; revisiting party autonomy in choosing decision-makers, including through institutional appointments or investment courts; equality of arms, the economics of access, and the role of costs and third-party funding; public-private disputes and special issues that arise when State entities arbitrate; public participation and transparency, and their effect on both ISDS and commercial arbitration; revisiting conventional wisdom in organizing arbitral proceedings; lessons to be learned from other dispute resolution frameworks; technology as friend and enemy, including new tools, new threats, and cybersecurity; arbitration of disputes in conflict and post-conflict zones; inter-generational blame and praise in investment arbitration; and the emergence of sovereign wealth funds as arbitration participants. A special section on 'New Frontiers in Arbitration' offers enlightening perspectives on new types of claims and new types of stakeholders likely to affect the future of international arbitration, including the potential for climate change disputes and enlarged participation.

CSR and Codes of Business Ethics in the USA, Austria (EU) and China and their Enforcement in International Supply Chain Arbitrations Peter 2021-03-27

This book analyzes the implementation of CSR reporting and codes of business conduct and ethics in the legal systems of the USA, Austria and China and their enforcement in international supply chain arbitrations. The book demonstrates that long-term profit maximization is increasingly intertwined with corporate ethics and CSR policies. In order to prevent window-dressing and greenwashing, certain control mechanisms and legal standards are required along the entire supply chain. This book introduces an ethics and CSR system recommending a reward-based whistleblowing mechanism, internal oversight by a CSR and Ethics Committee comprised of independent board members and at least one sustainability expert, and an external, independent and comprehensive assurance of CSR reports provided by auditing firms or newly formed governmental agencies consisting of certified CSR experts. The author emphasizes the significance for supply chain leaders to ensure contractual enforcement of their codes of business ethics and conduct along the supply chain. Against this background, the author created a comprehensive fictitious case scenario covering a supply chain dispute arising from the breach of the supply chain leader's code of business conduct and ethics by a lower-tier supply chain member. The author acknowledges the fact that in most of the cases the governing law of international supply chain contracts is English law or law based on English law. Thus, the author discusses potential contractual claims for damages arising from a loss of profits caused by a loss of reputation resulting from violations of core provisions of the chain leader's supplier code of conduct pursuant to English law. As international supply chain disputes usually involve more than two parties, and international arbitration is the ideal means for the resolution of these disputes, the book compares the arbitration rules for consolidations and joinders of some of the most significant international arbitration institutions: SIAC, ICC, AIAC, ICDR, VIAC, CIETAC and HKIAC. The book is directed at legal practitioners, legislators of various jurisdictions, board members of corporations, ethics and compliance officers, academics, researchers and students. It is the author's main goal that the book serves as an inspirational source for the establishment or the improvement of a corporate ethics and CSR system preventing window-dressing and greenwashing and covering the entire supply chain. Furthermore, it is intended that students develop a deeper understanding for the enforcement of corporate ethics and CSR policies.

Nuclear Power Plant Development - Cyril Chern 2021-04-15

Nuclear Power Plant Development covers the intricacies of developing a nuclear power plant project from a construction and legal standpoint. It deals with structuring, drafting, and negotiating a wide range of standard and specialised contracts relating to the development of nuclear power-generation projects and also covers the other forms of power-generating facilities. It covers the forms of contract, the law involved internationally, and potential areas of pitfalls and how to avoid them in a systematic format covering various forms of projects. It is suitable for solicitors and barristers involved in the contracting for such facilities and the handling of litigation related to them, government officials involved in the commissioning and development of nuclear facilities for regional governments, and engineers and contractors involved in the actual work of design and contract administration and dispute resolution.

Vacant Possession Keith Shaw 2010

Vacant possession is an element of property law that ensures a property is left in good condition when it changes hands. Every time a property is sold, or if tenants move out of rented property, vacant possession is

unavoidable; a vital part of the job of any property lawyer or surveyor. Yet this is the first book to look at this area in depth. If a property professional understands vacant possession they can make sure their cases move quickly and complete at a time that suits them. If they do not, they are vulnerable to others who know it better and can use the law to frustrate proceedings for months or even years while their clients continue to pay money on rent or mortgage payments for properties they're not using. This book is essential reading for all property lawyers and surveyors. It is destined to be the definitive guide to vacant possession.

A Practical Guide to Successful Construction Projects - Arent van Wassenauer 2017-04-21

Written by experienced and innovative projects lawyer Arent van Wassenauer, this book explains what the critical success factors are for construction projects to be completed on time, within everyone's budget, to the right quality, with all stakeholders satisfied and without disputes. In so doing, van Wassenauer discusses how such projects could be structured, tendered for, executed and completed, and what legal and non-legal mechanisms are available to achieve success in construction projects. Using examples of real projects, *A Practical Guide to Successful Construction Projects* provides tools for those in leading and managerial positions within the construction industry to change - where necessary - their usual operational methods into methods which are aimed at achieving project success.

Class Actions in Europe - Alan Uzelac 2021-06-23

Not so long ago, class actions were considered to be a textbook example of American exceptionalism; many of their main features were assumed to be incompatible with the culture of the civil law world. However, the tide is changing; while there are now trends in the USA toward limiting or excluding class actions, notorious cases like Dieseltgate are moving more and more European jurisdictions to extend the reach of their judicial collective redress mechanisms. For many new fans of class actions, collective redress has become a Holy Grail of sorts, a miraculous tool that will rejuvenate national systems of civil justice and grant them unprecedented power. Still, while the introduction of various forms of representative action has virtually become a fashion, it is anything but certain that attempting to transplant American-style class action will be successful. European judicial structures and legal culture(s) are fundamentally different, which poses a considerable challenge. This book investigates whether class actions in Europe are indeed a Holy Grail or just another wrong turn in the continuing pursuit of just and effective means of protecting the rights of citizens and businesses. It presents both positive and critical perspectives, supplemented by case studies on the latest collectivization trends in Europe's national civil justice systems. The book also shares the experiences of some non-European jurisdictions that have developed promising hybrid forms of collective redress, such as Canada, Brazil, China, and South Africa. In closing, a selection of topical international cases that raise interesting issues regarding the effectiveness of class actions in an international context are studied and discussed.

Access to Justice in Transnational B2C E-Commerce - Sutatip Yuthayotin 2014-11-17

This book identifies institutional mechanisms that can be used to promote consumer confidence in direct online sales with businesses (B2C e-commerce). It argues that enhancing the access to justice in a multidimensional sense can potentially offer an effective means of boosting consumer confidence. It introduces a conceptual framework for a multidimensional approach to access to justice in the context of consumer protection, describing the various reasonable criteria needed to satisfy consumer demands in B2C e-commerce. The framework, which reflects all essential aspects of consumers' expectations when they engage in online transactions, provides a benchmark for the evaluation of various consumer protection mechanisms. Based on an analysis of different mechanisms and using the framework's criteria, the practice of private ordering, which does not rely on the creation of rules of law but rather on the use of technology as a solution, appears to offer a meaningful way to enhance access to justice in B2C e-commerce. However, though private ordering holds considerable potential, certain weaknesses still need to be eliminated. This book demonstrates how private ordering can be successfully implemented with the help of an intermediary, a neutral third party that plays an integral part in the collaborative task of facilitating various aspects of private ordering, thus helping to limit the risks of failure and ensuring a fairer market setting. In order to move forward, it argues that the state, with its wealth of material resources and incentive options, is the institution best suited to acting as an intermediary in facilitating private ordering. This promising proposal can improve consumer protection, which will in turn boost consumer confidence.

Review of Civil Litigation Costs - Great Britain. Ministry of Justice 2010

In January 2009, the then Master of the Rolls, Sir Anthony Clarke, appointed Lord Justice Jackson to lead a fundamental review of the rules and principles governing the costs of civil litigation. This report intends to establish how the costs rules operate and how they impact on the

behavior of both parties and lawyers.

EU Law in the UK - Sylvia de Mars 2020-06-29

The first new textbook to publish since Brexit, EU Law in the UK tackles EU law with a post-Brexit perspective interwoven throughout. It takes a uniquely contextual approach designed to enliven the learning experience, support understanding, and help students appreciate the relevance and impact of EU law. Written in a concise and accessible style, and supported by lively academic analysis, the author carefully guides students through key complexities, issues, and debates. EU Law in the UK not only supports students to understand the core elements of EU institutional and substantive law, but also to critically examine the implications on UK law of the UK's decision to leave the EU. The book's unique contextual approach offers a highly practical and engaging way to learn about EU law. The context is set at the start of each chapter by way of scenarios including real quotes from politicians, parliamentary reports, and fictional situations. Throughout the chapters, students are then invited to apply legal principles to these scenarios. This approach serves to reinforce and enliven students' learning.

Law and the Built Environment - Douglas Wood 2011-01-25

Law and the Built Environment is a core textbook for all students undertaking compulsory law modules on construction, real estate and property management programmes. This single text provides an accessible introduction to the many areas of law studied by aspiring built environment professionals. Written by a team of lecturers with many years' teaching experience in these areas, key principles of English law are placed in their relevant professional context and clearly explained in exactly the right level of detail for success in the modules studied. The book also focuses in greater depth on some specialist areas of built environment professional practice, including construction contracts, health and safety, rent review, dilapidations, and lease renewals. It provides an essential resource for students studying for qualifications leading to professional membership of the Royal Institution of Chartered Surveyors (RICS) or the Chartered Institute of Building (CIOB). It caters primarily for students studying these subjects at bachelor's degree level, but will also be suitable for students on programmes at HNC and HND levels, as well as those undertaking professional examinations. It will also provide introductory reading for students undertaking master's level programmes, and particularly for the increasing numbers of graduates from other disciplines who are now studying on RICS-accredited master's degree conversion programmes.

Proceedings of the Institution of Civil Engineers - 2005

Construction Law - Julian Bailey 2016-07-15

Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey Lloyd QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law.

Cornerstone on Social Housing Fraud - Cornerstone Barristers 2021-07-22

In response to social housing fraud, the Government introduced the Prevention of Social Housing Fraud Act 2013, which made sub-letting and parting with possession of social lets a specific criminal offence and granted local authorities the power to prosecute those who had acted in such a manner. Not only can offenders be jailed, but they can also be fined and ordered to pay an unlawful profit order, thus opening up a

revenue opportunity to cash-strapped social landlords. Social housing fraud is an important and high profile issue. This title provides a thorough overview of this regime and how local authorities can maximise their chances of recovering possession of properties affected by fraud, obtaining 'compensation' and securing a conviction, including techniques for effective evidence gathering. Topics covered, include: - Possession action in the county court - Sub-letting/parting with possession - Investigation powers - Criminal offences and procedure - Civil remedies - GDPR and the Data Protection Act 2018 For ease of reference, relevant primary and secondary legislation has been included within the appendices, which also includes templates for: Particulars of Claim (county court), Complaint (magistrates' court) Notice to Quit and Notice Seeking Possession. There is also a useful landlord checklist, to ensure nothing has been overlooked during what can be a complex process.
