United States Army Dental Service in World War II - George F. Jeffcott 1955

Dentistry, during the pioneer days of the profession in the United States, had no military status; and there exist only a few unofficial references to dental treatment in the accounts of the first wars in which the country was engaged. A notable exception, however, was the dental treatment accomplished for General George Washington, who experienced dental difficulties during the time he served as Commander in Chief

of the Colonial Army and later during his terms as President. Records reveal that Washington had several dentures made by civilian dentists and that he was very much pleased with his dental service. Almost one hundred years passed after the Revolutionary War before there was any official Army recognition of dentistry or legislative action to initiate the organization of an Army Dental Corps. During these hundred years the profession continued to develop and to broaden its scope. The first organized effort to secure dentists for an army was the conscription of these to serve in the Confederate Army in 1864.2 The soldiers of the Confederate armies could not pay for dental treatment in the depreciated currency of the Confederacy since the fee for one gold filling was more than 6 months' pay of a private. Consequently, the Confederate States Congress passed a law for the conscription of dentists who were to have the rank, pay, and allowances to which their

position in the Army entitled them, and in addition extra duty pay for extraordinary skill as allowed by The Surgeon General. The rank and pay offered the Confederate dental officers is not recorded. pg 8. JMD.
