## **Research on Project, Programme and Portfolio Management - Roxana Cuevas**

2020-12-17

This book collects recent work presented at the 31st IPMA

Congress, which was held in Merida, Mexico, from September 30th to October 2nd, 2019. It covers a range of project, programme and portfolio management contexts, with the general aim of integrating sustainability into project management. The book is structured into three parts. The first part covers concepts and approaches related to the

integration of sustainability in project management. The second part presents research on integrating sustainability into project management in different industries and regions. The final part takes specific perspectives on integrating sustainability into project management related to learning and continuing competence development. The book offers a valuable resource for all researchers interested in studying the emerging trends in incorporating sustainability in project, programme and portfolio management.

The Report: Saudi Arabia 2014

- Oxford Business Group  
2014-08-18

Home to an estimated 15.9% of the world's proven oil reserves, Saudi Arabia is the single largest economy in the Middle East and North Africa.

According to the Ministry of Finance, real GDP grew by 3.8% to \$746bn in 2013. While oil income is expected to continue to account for the majority of government revenues for the foreseeable future, the non-oil sector has expanded significantly in recent decades growing 9.3% in 2013. Indeed, while some Western countries may be seeing a return to cautious optimism and leading emerging economies are weighing the potential impact on capital flows of tapering in the US Federal Reserve's quantitative easing programme, Saudi Arabia is seeing sustained growth buoyed by high global oil prices and internal investment in its own

infrastructure. Some 15 years after Saudi Arabia attended the inaugural meeting of G20 countries, its key economic indicators make it the envy of many other member states.

Given the size of Saudi economy within the regional and indeed global market, OBG looks in depth at bilateral trade between ASEAN nations and the GCC.

Re-balancing China - Peter Nolan 2015-03-01

'Re-balancing China' addresses three key sets of issues in China's political economy. Part One provides an analysis of the profound effect of the global financial crisis upon China's economy, as well as the positive impact of the massive rescue package that was implemented in response to the crisis. Part Two focuses on the challenge of globalization for China's industrial policy. After more than two decades of industrial policy, China still has a negligible number of large firms that are competitive in global markets. China's experience presents a fundamental challenge to traditional concepts of industrial policy and development. Part Three examines China's international relations - in particular, its relationship with the US and the interactions between the two countries in the East and South China Seas.

**Cash and Dash** - Bernardo  
Bátiz-Lazo 2018-06-18  
Cash and Dash: How ATMs and  
Computers Changed Banking  
uses the invention and  
development of the automated  
teller machine (ATM) to explain  
the birth and evolution of  
digital banking, from the 1960s  
to present day. It tackles head  
on the drivers of long-term  
innovation in retail banking  
with emphasis on the payment  
system. Using a novel approach  
to better understanding the  
industrial organization of  
financial markets, Cash and  
Dash contributes to a broader  
discussion around innovation

and labour-saving devices. It  
explores attitudes to the patent  
system, formation of standards,  
organizational politics, the  
interaction between regulation  
and strategy, trust and  
domestication, maintenance  
versus disruption, and the huge  
undertakings needed to  
develop online real-time  
banking to customers.

provides business profiles,  
hiring and workplace culture  
information at more than 40  
top employers, including  
Microsoft, Oracle, Dell, IBM,  
Cisco and more.

**Robo-Advisory** - Peter Scholz  
2020-12-28

Robo-Advisory is a field that  
has gained momentum over  
recent years, propelled by the  
increasing digitalization and  
automation of global financial

markets. More and more money has been flowing into automated advisory, raising essential questions regarding the foundations, mechanics, and performance of such solutions. However, a comprehensive summary taking stock of this new solution at the intersection of finance and technology with consideration for both aspects of theory and implementation has so far been wanting. This book offers such a summary, providing unique insights into the state of Robo-Advisory. Drawing on a pool of expert authors from within the field, this edited collection aims at being the vital go-to resource for academics, students, policy-makers, and practitioners alike wishing to engage with the topic. Split into four parts, the book begins with a survey of academic literature and its key insights paired with an analysis of market developments in Robo-Advisory thus far. The second part tackles specific questions of implementation, which are complemented by practical case studies in Part

III. Finally, the fourth part looks ahead to the future, addressing questions of key importance such as artificial intelligence, big data, and social networks. Thereby, this timely book conveys both a comprehensive grasp of the status-quo as well as a guiding outlook onto future trends and developments within the field.

*Managing Digital Open*

*Innovation* Pierre-jean

Barlatier 2020-05-13

Recent developments of Internet-based digital technologies have revealed a huge potential of developing open, collaborative and network-centred innovation. However, firms face major challenges in using new technologies for rapid prototyping, data-mining, simulation, visualization, etc. to support their Open Innovation strategies. Responding to the need for further conceptual and empirical research on technology-enhanced open innovation, this book provides fresh and topical insights on

how firms from different sectors have successfully implemented digital technologies for Open Innovation. Based on rich empirical data, this book discusses the benefits and drawbacks, the processes, the characteristics and the management practices of ICT-driven Open Innovation in private as well as public organizations.

Chinese Firms, Global Firms - Peter Nolan 2014-04-11

China has achieved remarkable, sustained economic growth under the policies of 'reform and opening up' put into place since the late 1970s. China's industrial policies have nurtured a large group of firms with high profits and a high market capitalisation. However, few people in the West can name a single Chinese firm. During the modern era of capitalist globalisation firms from the high income countries have spread their business systems across the world. This has presented a profound challenge for industrial policy in

developing countries, including even China, the world's second largest economy. China is unique among large latecomer developing countries in having reached the position of being a huge, fast-growing economy, with a tremendous impact on the rest of the world, but lacking a substantial group of globally competitive firms. This volume explores this paradox. Fully understanding the industrial policy challenge that the era of capitalist globalisation has produced for China is essential for harmonious international relations.

*Artificial Intelligence-based Internet of Things Systems*  
Souvik Pal 2022-01-11

The book discusses the evolution of future generation technologies through Internet of Things (IoT) in the scope of Artificial Intelligence (AI). The main focus of this volume is to bring all the related technologies in a single platform, so that undergraduate and postgraduate students, researchers, academicians, and

industry people can easily understand the AI algorithms, machine learning algorithms, and learning analytics in IoT-enabled technologies. This book uses data and network engineering and intelligent decision support system-by-design principles to design a reliable AI-enabled IoT ecosystem and to implement cyber-physical pervasive infrastructure solutions. This book brings together some of the top IoT-enabled AI experts throughout the world who contribute their knowledge regarding different IoT-based technology aspects.

**Digitalization** - Daniel R. A. Schallmo 2021-05-29

What do vehicle manufacturers like Rosenbauer, logistics companies like DB Schenker, a compressor manufacturer such as Bauer, an elevator manufacturer such as ThyssenKrupp, and a hygiene goods manufacturer like Hagleitner all have in common? They all use the potential of digitization to offer smarter and faster services to customers and to actively

shape the digital transformation of their business models. This book provides valuable insights with concise and established guidelines for the successful digital transformation of business models. Professionals in management, strategic planning, business development, as well as researchers and students from the fields of innovation/technology management, strategic management, and entrepreneurship would particularly benefit from this book.

**Made to Order** - Kenneth Womack 2013-11-25  
Made To Order: The Sheetz Story traces the fascinating history of Sheetz, Inc., a regional convenience retailer

that battled the odds and cemented its name among the acclaimed ranks of America's most successful private companies. From its humble dairy store origins in Pennsylvania, Sheetz became a convenience-store giant, amassing hundreds of locations across six states, and along the way, combined numerous creative marketing campaigns with retail innovations to shape the Sheetz recipe for success. Made To Order: The Sheetz Story narrates how the company remade itself in the face of dramatically shifting demographics, bravely stood up for its customer base when confronted with a serious crisis, and emerged as a revered and much-beloved retail phenomenon.

*Securing the Nation's Critical Infrastructures* Drew Spaniel 2022-11-24

Securing the Nation's Critical Infrastructures: A Guide for the 2021-2025 Administration is intended to help the United States Executive administration, legislators, and critical infrastructure decision-makers prioritize cybersecurity, combat emerging threats, craft meaningful policy, embrace modernization, and critically evaluate nascent technologies. The book is divided into 18 chapters that are focused on

the critical infrastructure sectors identified in the 2013 National Infrastructure Protection Plan (NIPP), election security, and the security of local and state government. Each chapter features viewpoints from an assortment of former government leaders, C-level executives, academics, and other cybersecurity thought leaders. Major cybersecurity incidents involving public sector systems occur with jarringly frequency; however, instead of rising in vigilant alarm against the threats posed to our vital systems, the nation has become desensitized and demoralized. This publication was developed to deconstruct the normalization of cybersecurity inadequacies in our critical infrastructures and to make the challenge of improving our national security posture less daunting and more manageable. To capture a holistic and comprehensive outlook on each critical infrastructure, each chapter includes a foreword that introduces the sector and

perspective essays from one or more reputable thought-leaders in that space, on topics such as: The State of the Sector (challenges, threats, etc.) Emerging Areas for Innovation Recommendations for the Future (2021–2025) Cybersecurity Landscape ABOUT ICIT The Institute for Critical Infrastructure Technology (ICIT) is the nation’s leading 501(c)3 cybersecurity think tank providing objective, nonpartisan research, advisory, and education to legislative, commercial, and public-sector stakeholders. Its mission is to cultivate a cybersecurity renaissance that will improve the resiliency of our Nation’s 16 critical infrastructure sectors, defend our democratic institutions, and empower generations of cybersecurity leaders. ICIT programs, research, and initiatives support cybersecurity leaders and practitioners across all 16 critical infrastructure sectors and can be leveraged by anyone seeking to better understand cyber risk

including policymakers, academia, and businesses of all sizes that are impacted by digital threats.

**Post-LBO development -**

Richard K. Lenz 2010-03-01

Richard K. Lenz analyses how LBOs evolve after the financial investors have exited. Based on three case studies of former LBOs in Germany, he shows that performance decline is often related to the weakening of the former performance-enhancing series of governance instruments.

*Is China Buying the World?*

Peter Nolan 2013-04-30

China has become the world's second biggest economy and its largest exporter. It possesses the world's largest foreign exchange reserves and has 29 companies in the FT 500 list of the world's largest companies. 'China's Rise' preoccupies the global media, which regularly carry articles suggesting that it is using its financial resources to 'buy the world'. Is there any truth to this idea? Or is this just scaremongering by Western commentators who have little interest in a balanced presentation of China's role in

the global political economy? In this short book Peter Nolan - one of the leading international experts on China and the global economy - probes behind the media rhetoric and shows that the idea that China is buying the world is a myth. Since the 1970s the global business revolution has resulted in an unprecedented degree of industrial concentration. Giant firms from high income countries with leading technologies and brands have greatly increased their investments in developing countries, with China at the forefront. Multinational companies account for over two-thirds of China's high technology output and over ninety percent of its high technology exports. Global firms are deep inside the Chinese business system and are pressing China hard to be permitted to increase their presence without restraints. By contrast, Chinese firms have a negligible presence in the high-income countries - in other words, we are 'inside them' but they are not yet 'inside us'.

China's 70-odd 'national champion' firms are protected by the government through state ownership and other support measures. They are in industries such as banking, metals, mining, oil, power, construction, transport, and telecommunications, which tend to make use of high technology products rather than produce these products themselves. Their growth has been based on the rapidly growing home market. China has been unsuccessful so far in its efforts to nurture a group of globally competitive firms with leading global technologies and brands. Whether it will be successful in the future is an open question. This balanced analysis replaces rhetoric with evidence and argument. It provides a much-needed perspective on current debates about China's growing power and it will contribute to a constructive dialogue between China and the West.

Cash and Dash - Bernardo Bátiz-Lazo 2018-06-28

Cash and Dash: How ATMs and Computers Changed Banking

uses the invention and development of the automated teller machine (ATM) to explain the birth and evolution of digital banking, from the 1960s to present day. It tackles head on the drivers of long-term innovation in retail banking with emphasis on the payment system. Using a novel approach to better understanding the industrial organization of financial markets, Cash and

Dash contributes to a broader discussion around innovation and labour-saving devices. It explores attitudes to the patent system, formation of standards, organizational politics, the interaction between regulation and strategy, trust and domestication, maintenance versus disruption, and the huge undertakings needed to develop online real-time banking to customers.
