Good Food, Bad Diet - Abby Langer 2021-01-05

In this science-based book, registered dietitian Abby Langer tackles head-on the negative effects of diet culture and offers advice to help you enjoy food and lose weight without guilt or shame. There are so many diets out there, but what if you want to eat well and lose weight without dieting, counting, or restricting? What if you want to love your body, not punish it? Registered dietitian Abby Langer is here to help. In her first-ever book, Abby takes on our obsession with being thin and the diets that are sucking the life, sometimes literally, out of us. For the past twenty years, she has worked with clients from all walks of life to free them from restrictive diets and help them heal their relationship with food. Because all food is good for us—yes, even carbs and fats. All diets are bad. Diets are like Band-Aids for what's really bothering us: Although we might lose weight, they prey on our insecurities, rob us of time and money, and often leave us with the same negative views of food and our bodies that we've always had. When the weight comes back, we still haven't solved the real issues behind our eating habits—our "why." This book is different. Chapter by chapter, Abby helps readers uncover the "why" behind their desire to lose weight and their relationship with food, and make lasting, meaningful change to the way they see food, nutrition, themselves, and the world around them. In this book, you'll learn how guilt and shame affect your food choices, how fullness and satisfaction aren't the same feeling, why it's important to quiet your "diet voice" and enjoy food, and what the best way to eat is according to science. Empowering, inclusive, smart, and a must-have, Good Food, Bad Diet will give you the tools to reject diets, repair your relationship with food, and lose weight so you can move on with your life.

Smart People Don't Diet - Charlotte N. Markey 2015-02-11

Being on a diet is a miserable experience for most people, and it rarely leads to the desired goal of shedding fat. In Smart People Don't Diet, Dr Charlotte N. Markey presents a refreshingly different perspective, addressing the underlying causes of weight gain and offering proven strategies for lasting weight management. This book will show you how to eat well, lose weight, and keep it off - without dieting. The DASH Diet Action Plan Marla Heller 2007

The DASH Diet Action Plan is the user-friendly teaching guide to the DASH diet. Initially, many people find it difficult to follow the DASH diet. This book makes it simple to understand and put into practice. The book makes it easy to lose weight with the DASH diet, and it has realistic ways to add exercise. Although the book was not intended to be an aggressive weight loss book, people are writing to say that they have surprised themselves by finding it easy to lose weight following the plan! Many people find the DASH diet to be hard to implement and sustain in a hectic lifestyle. The average American gets 2 - 3 servings of fruits and vegetables combined each day, so following the DASH diet may seem daunting. The DASH Diet Action Plan book is designed to help you with more than just "what" is involved with the DASH diet, it also shows you "how." How to follow the DASH diet in restaurants, how to lose weight, how to make over your kitchen to make it easy to follow your plan, how to fit in exercise, how to reduce salt intake, how to add vegetables even if you "hate" vegetables. And the book helps you make your own personal plan with specific steps you will take to fit the DASH diet into your daily routine. Our readers say that this is the best DASH diet book! Your step-by-step plan will include: setting your goals for blood pressure and cholesterol, determining the calorie-level you need for maintenance or weight loss, developing meal plans, developing a realistic exercise plan, adjusting the DASH diet to accommodate other health problems, choosing the key DASH diet foods, reading food labels, and learning how to incorporate more vegetables in your diet, and setting up your kitchen to make it easy to stay on track. This book was written by a registered dietitian who is experienced in helping people make sustainable behavior changes, and make healthy eating part of their real lives. She knows that people need flexibility and options to choose different approaches, since not everyone has the time or the interest in cooking or making drastic changes in how they eat. The book incorporates tools that will help you plan the specific steps you will take to adopt the DASH diet. Research shows that people who make concrete plans are more likely to be successful with adopting new health behavior. This should improve your ability to lower your blood pressure (and cholesterol), without medication.

Now, thanks to Sarah, I've finally found what works for me! Her detox approach is a celebration of food and feeling your best. No punishment, restriction or radical plans. Instead, a clear roadmap to restoring your best health, based on actual science (thanks to the countless medical studies Sarah loves to read). Anti-Diet - Christy Harrison 2019-12-24

Reclaim your time, money, health, and happiness from our toxic diet culture with groundbreaking strategies from a registered dietitian, journalist, and host of the Food Psych podcast. 68 percent of Americans have dieted at some point in their lives. But upwards of 90% of people who intentionally lose weight gain it back within five years. And as many as 66% of people who embark on weight-loss efforts end up gaining more weight than they lost. If dieting is so clearly ineffective, why are we so obsessed with it? The culprit is diet culture, a system of beliefs that equates thinness to health and moral virtue, promotes weight loss as a means of attaining higher status, and demonizes certain ways of eating while elevating others. It's sexist, racist, and classist, yet this way of thinking about food and bodies is so embedded in the fabric of our society that it can be hard to recognize. It masquerades as health, wellness, and fitness, and for some, it is all-consuming. In *Anti-Diet*, Christy Harrison takes on diet culture and the multi-billion-dollar industries that profit from it, exposing all the ways it robs people of their time, money, health, and happiness. It will turn what you think you know about health and wellness upside down, as Harrison explores the history of diet culture, how it's infiltrated the health and wellness world, how to recognize it in all its sneaky forms, and how letting go of efforts to lose weight or eat "perfectly" actually helps to improve people's health—no matter their size. Drawing on scientific research, personal experience, and stories from patients and colleagues, *Anti-Diet* provides a radical alternative to diet culture, and helps readers reclaim their bodies, minds, and lives so they can focus on the things that truly matter.

The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, How Not to Die includes Dr. Greger's Daily Dozen—a checklist of the twelve foods we should consume every day.
