*Spirit Guides from the Future* David Wegert

2014-02

The book is a telepathic communication between myself and Dar, a evolved human from 23 million years in the future, as well as several other guides, spiritual and otherwise, from various future time periods. Although most of the contact is through Dar, several of his companions, from various timelines from a few centuries to over 1000 million years in the future have made some observations about various time periods. The book covers technology, spirit guides, singularities, timelines, evolution, time travel, parallel worlds, future cities and other realities. It also covers altered states of consciousness, the 2012 event, space travel, time lines, advanced data storage, power generation, future history and my notes. There is discussion in time and the nature of reality, as well as technological development and where it is leading us into the future. It is about possibilities, and I do not mean it to be either a positive or negative statement, but an observation of what is. I hope the book will encourage some people to objectively seek out alternative possibilities.

**Politics, Personalities, and Persistence** - Beverley Clare Williams Hicks 2020-10-06  
Politics, Personalities, and Persistence tells the story of the evolution of registered psychiatric nursing in the province of Manitoba. This comprehensive account traces the distinct profession's transition from the asylums of Manitoba, where for seventy years psychiatric nurses had cared for the mentally ill when few others were interested in them, to the halls of academia in Brandon University in 1986, the first university in Canada to grant a baccalaureate degree to psychiatric nurses. This specialty began in the asylums and took further shape in this small prairie university on the banks of the Assiniboine River courtesy of the energy and vision of many dedicated individuals

who believed in the legitimate place of psychiatric nursing in the health-care field and pushed hard for its recognition. What makes this story unique is that the emergence of psychiatric nursing in Manitoba—and indeed in Western Canada—countered the established practice of the general nursing regulatory bodies, who viewed psychiatric nursing as a specialty to be pursued at the graduate level. At times this created tension between the two groups.

Politics, Personalities, and Persistence draws on documentary records from Manitoba archives, as well as the personal recollections and colourful reminiscences of key players. It explores the legal recognition of psychiatric nursing, challenges to its place in the nursing community, and the role of government policies in the development of the profession.

**Teaching Science with Hispanic ELLs in K-16 Classrooms** - Dennis W. Sunal 2010-04-01

The goal of this fourth volume of RISE was to provide a research foundation that demonstrates an agenda to strengthen the preparation and enhancement of teachers of science for regions and states experiencing extensive initial growth of Hispanic ELLs in schools. The goal was carried out through a series of events that led to the planning and subsequent dissemination of research being conducted by various stakeholders throughout the United States.

Researchers were first invited from regions of the country that have had a long history of with Hispanic ELLs in classrooms as well as those regions where initial and now extensive growth has occurred only in the past few years. A national conference Science Teacher Education for Hispanic English Language Learners in the Southeast (SHELLS) funded through the National Science Foundation was used as one of the dissemination methods to establish and secure commitments from researchers to a conduct and report research to strengthen teacher preparation for science. The national

call for manuscripts requested the inclusion of major priorities and critical research areas, methodological concerns, and concerns and results of implementation of teacher preparation and development programs.

**Howard University: the First Hundred Years, 1867-1967** - Rayford W. Logan 1969

When Rayford W. Logan's astute history of Howard University appeared in 1969, Logan was in a unique position to analyze one of the nation's most prominent African American colleges. He had recently completed nearly thirty years at Howard as a history professor, living and teaching through almost a third of the school's first century. Drawing from his own knowledge and university documents, Logan traced Howard's chronology from 1866, when it was conceived as a theological seminary for African American ministers, to the increasingly successful, and in Logan's words, cosmopolitan, institution of the 1960s. Logan detailed university milestones, including Howard's founding by an act of Congress in 1867 and the election of Dr. Mordecai W. Johnson, the university's first black president, in 1926, as well as the accomplishments of Howard graduates. More than thirty years after its first publication, Logan's engaging account is essential for a thorough understanding of Howard, and its place in the legacy of historically black universities.
