Eugeen Van Mieghem (1875-1930). Augustine Pautre - 2015

In zijn sociale belangstelling werd de Eugène Van Mieghem bijzonder geboeid door de duizenden landverhuizers die hun land van oorsprong (vooral Polen en Rusland) voor de pogroms ontvluchtten om hun geluk te gaan zoeken in de Nieuwe Wereld. In 1901 kende Van Mieghem heel wat succes op de Brusselse salon van "La Libre Esthétique" waar zijn achttal pastels en tekeningen hingen naast werk van Franse impressionisten als o.a. Monet, Cézanne, Pissarro, Renoir en Vuillard. Op 28 januari 1902 huwde hij met zijn verloofde Augustine Pautre, een Brussels meisje dat lessen volgde aan de Antwerpse Academie.

International Criminal Law from a Swedish Perspective - Iain Cameron 2011

This book describes and analyzes the Swedish legal rules and practices regarding jurisdiction, mutual legal assistance in criminal matters, extradition, and the EU arrest warrant. Swedish law and practice in

international criminal law is particularly significant for two main reasons. First, it is a system which is both logical and coherent. It displays a considerable Germanic theoretical influence, but its sophistication is tempered by pragmatism and is designed to facilitate "user-friendliness." Second, the Nordic countries - because of a common history, shared language, and cultural factors - have long had a very high and effective degree of cooperation in international criminal law matters. The experience of Nordic cooperation has been an important inspiration for the legislative work of the EU in the field. To create a "European judicial space," based upon both harmonization and mutual recognition of decisions, the EU has produced a large number of instruments to improve judicial and prosecutorial cooperation in criminal matters. With the adoption of the Lisbon Treaty, the pace of EU legislation in the field will increase. These EU instrument cannot work effectively unless they are integrated properly into the criminal law systems of the Member States, and these systems in turn facilitate efficient cooperation. The European judicial space also requires a high degree of understanding of other systems and a high level of mutual trust. At a time when regionalization and globalization are leading to an increase in the number of offenses with a transnational dimension, this book is designed to make the "best practices" of the Swedish system of international criminal law accessible to an English-speaking legal public. Plutonium Handbook: Chemistry - David L. Clark 2019

Fifty years after publication of the original Plutonium Handbook, this timely and authoritative 2nd edition provides unparalleled coverage of plutonium research. The greatly expanded 2nd edition contains six volumes of research content and a seventh volume as a complete index. (Each individual volume also has its own index). Topics span the history

of the discovery of plutonium, properties of plutonium isotopes, chemistry and properties of plutonium metal and alloys, plutonium aging, thermodynamic trends of plutonium, plutonium in nuclear fuels, waste forms, and heat sources, packaging, storing, and transportation of plutonium, nuclear security and safeguards, and techniques for working with plutonium. With authorship from 13 countries, this truly international collaboration brings together an entire community of researchers from academia, national laboratories, and research institutions. The Plutonium Handbook (2nd edition) is expertly produced and will be a mainstay for generations.

Ageing Management for Nuclear Power Plants: International Generic Ageing Lessons Learned (Igall) - International Atomic Energy Agency 2020-10-31

This Safety Report provides detailed information on ageing management programmes and time limited ageing analyses to manage existing and potential ageing effects and degradation mechanisms of structures, systems and components (SSCs) that are important to the safety of nuclear power plants. It has been written to assist operating organizations and regulatory bodies by specifying a technical basis and providing practical guidance on managing ageing of mechanical, electrical and instrumentation and control components, and civil structures. It also provides a common, internationally recognized basis on what constitutes an effective ageing management programme, a knowledge base on ageing management for design of new plants and design reviews, and a roadmap to available information on ageing management.

Where Have All the Woolly Mammoths Gone? - Ted S. Frost 1976

Current Issues in Shipping, Ports and Logistics - Theo Notteboom 2011

Bringing together an international network of leading scholars, this multidisciplinary book unravels some of the most pressing challenges to shipping, ports, and logistics. Divided into five parts--shipping, the analysis of flows and networks, terminal operations and performance, logistics, and port development and governance--this record is an essential read for practitioners in the maritime and logistics world, postgraduate students, policy makers, and professional organizations. As market players expand and improve their services in line with increased requirements on rates, reliability, environmental footprint, and safety and security, this compendium encourages further systematic thinking.

Rethinking G.K. Chesterton and Literary Modernism Michael Shallcross 2017-11-27

This book comprehensively rethinks the relationship between G.K. Chesterton and a range of key literary modernists. When Chesterton and modernism have previously been considered in relation to one another, the dynamic has typically been conceived as one of mutual hostility, grounded in Chesterton's advocacy of popular culture and modernist literature's appeal to an aesthetic elite. In setting out to challenge this binary narrative, Shallcross establishes for the first time the depth and ambivalence of Chesterton's engagement with modernism, as well as the reciprocal fascination of leading modernist writers with Chesterton's fiction and thought. Shallcross argues that this dynamic was defined by various forms of parody and performance, and that these histrionic expressions of cultural play not only suffused the era, but found particular embodiment in Chesterton's public persona. This reading not only enables a far-reaching reassessment of Chesterton's corpus, but also produces a framework through which to re-evaluate the creative and critical projects of a host of modernist writers—most sustainedly, T.S. Eliot, Wyndham Lewis, and Ezra Pound—through the prism of Chesterton's disruptive presence. The result is an innovative study of the literary performance of popular and 'high' culture in early twentieth-century Britain, which adds a valuable new perspective to continuing critical debates on the parameters of modernism.

Salsiology - Vernon Boggs 1992

Boggs presents a readable, exciting history of Salsa, showing how Afro-Cuban music was embraced in New York City and how it has undergone cycles of popularity and been replicated abroad. From its roots in Cuba through present-day Salsa clubs, Boggs provides a tour of a popular music form that has had a significant impact on the Latin community as well as contemporary musicians and composers. Extensively illustrated with photographs of the bands and clubs as well as the key leaders and promoters, the book also contains interviews with top performers and others instrumental in making salsa what it is today.

Reykjavik Revisited - George P. Shultz 2013-09-01

Drawn from presentations made at the Hoover Institution's October 2007 conference, this collection of essays examines the practical steps necessary to address the current security challenges of nuclear weapons and to move toward the Reykjavik goal of eliminating all nuclear weapons. The distinguished group of contributors includes former officials of the past six administrations—Republican and Democratic—along with senior scholar and scientific experts on nuclear issues.

Contemporary Advances in Innovative and Applicable Information Technology - Jyotsna Kumar Mandal 2018-10-01

The book enriches the literature on different sub-domains of applied information technology. The ICCAIAIT Proceedings presents the high quality research papers presented at ICCAIAIT 2018. The contributions cover the contemporary issues in data analytics, computational intelligence, nature inspired computing, cyber physical systems, cloud computing, social network and intelligent computing on climate change. The volume is an important resource for educationists, academics, scholars and practitioners from both the public and private sectors.

Unjustified Enrichment Stephen Swann 2010-03-12

"Unjustified enrichment" is one of the three main non-contractual obligations dealt with in the DCFR. In recent years unjustified enrichment has been one of the most intellectually animated areas of private law. In an area of law whose territory is still partially uncharted and whose boundaries are contested, this volume of Principles of European Law will be invaluable for academic analysis of the law and its development by the courts. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come but provides also a fairly detailed indication of the present legal situation in the Member States.

Grillage Analogy in Bridge Deck Analysis S. Surana 1998

This book deals with the well established computer-aided method of grillage analogy as applied to analysis of bridge decks. The method, applicable to various types of bridge decks (such as slab bridges, T-beam bridges and box-girder bridges), can handle rigid or flexible support conditions, and right, skew or curved plan layouts. The procedure and recommendations for idealising the actual bridge decks and loadings into mathematical models are discussed. Two programs, given in ready-to-use form, along with descriptions of various subroutines, can analyse a

variety of bridge decks accurately and obtain all the responses required in the design. Their uses are explained through worked-out examples. These programs, along with input-data and exhaustive output results of all the worked-out examples, are also available on a diskette and can be ordered separately from the authors through the publisher. This will help those who do not want to type programs from the book and run into possible risk of errors. The book will be useful for the students, researchers, teachers, designers and consultants engaged in analysing, designing, vetting, tendering or constructing bridges.
