Invitation to Psychology - Carole Wade 2006-03-01

Through lively writing and stimulating examples, authors Carole Wade and Carol Tavris invite readers to actively explore the field of psychology and the fundamentals of critical and scientific thinking. "Invitation to Psychology" presents the science of psychology according to six areas of the learner's experience: Your Self, Your Body, Your Mind, Your Environment, Your Mental Health and Your Life. This unique organization engages readers from the very beginning and gives them a framework for thinking about human behavior. Incorporating many active learning and critical thinking features, a balance of classic and contemporary research, and thorough integration of the psychology of women and men of all cultures-readers will learn much to take with them. For individuals seeking an introduction to psychology.

Young Washington - Peter Stark 2018-05-01

FINALIST FOR THE GEORGE WASHINGTON BOOK PRIZE A new, brash, and unexpected view of the president we thought we knew, from the bestselling author of *Astoria* Two decades before he led America to independence, George Washington was a flailing young soldier serving the British Empire in the vast wilderness of the Ohio Valley. Naïve and self-absorbed, the twenty-two-year-old officer accidentally ignited the French and Indian War—a conflict that opened colonists to the possibility of an American Revolution. With powerful narrative drive and vivid

writing, Young Washington recounts the wilderness trials, controversial battles, and emotional entanglements that transformed Washington from a temperamental striver into a mature leader. Enduring terrifying summer storms and subzero winters imparted resilience and self-reliance, helping prepare him for what he would one day face at Valley Forge. Leading the Virginia troops into battle taught him to set aside his own relentless ambitions and stand in solidarity with those who looked to him for leadership. Negotiating military strategy with British and colonial allies honed his diplomatic skills. And thwarted in his obsessive, youthful love for one woman, he grew to cultivate deeper, enduring relationships. By weaving together Washington's harrowing wilderness adventures and a broader historical context, Young Washington offers new insights into the dramatic years that shaped the man who shaped a nation.

Introduction to Psychology Charles Stangor 2014

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

Fundamentals of Anatomy and Physiology - Donald C Rizzo
2015-02-27

Packed with vivid illustrations, best-selling FUNDAMENTALS OF ANATOMY AND PHYSIOLOGY, 4E is written specifically for learners in a

one-semester introductory A&P course in the allied health field who have little or no previous knowledge of anatomy and physiology. Known for its clear approach to teaching, the text is widely praised for its ability to break A&P down into very simple, easy to understand language. Content is organized according to body systems and focuses on the body working together to promote homeostasis. Improving both the quality and quantity of text illustrations, the Fourth Edition's new art program brings text concepts to life with new figures throughout. E-Z Psychology - Nancy Melucci 2009-08-01

This new E-Z title covers material as it is taught on a college-101 level. A brief history and overview of modern psychology is followed by chapters on perception, conditioning and learning, states of consciousness, human sexuality, personality testing, and abnormal behavior and its treatments. Barron's continues its ongoing project of improving, updating, and giving contemporary new designs to its popular Easy Way books, now re-named Barron's E-Z Series. The new cover designs reflect the books' brand-new page layouts, which feature extensive two-color treatment, a fresh, modern typeface, and many more graphics. In addition to charts, graphs, and diagrams, the graphic features include instructive line illustrations, and where appropriate, amusing cartoons. Barron's E-Z books are self-teaching manuals designed to improve students' grades in many academic and practical subjects. In most cases, the skill level ranges between senior high school and college-101 standards. In addition to their self-teaching value, these books are also widely used as textbooks or textbook supplements in classroom settings. E-Z books review their subjects in detail and feature short quizzes and longer tests to help students gauge their learning progress. All exercises and tests come with answers. Subject heads and key phrases are set in a second color as an easy reference aid.

Psychology (Loose Leaf) - Don H. Hockenbury 2008-12-06

More than any other psychology textbook, Don and Sandra Hockenbury's Psychology relates the science of psychology to the lives of the wide range of students taking the introductory course. Now Psychology returns in a remarkable new edition that shows just how well-attuned the Hockenburys are to the needs of today's students and instructors. Psychology began with a basic idea: combine scientific authority with a narrative that engages students and relates to their lives. From decades of experience teaching, the Hockenburys created a book filled with cutting-edge science and real-life stories that draw students of all kinds into the course.

Discovering Psychology: The Science of Mind - John T. Cacioppo
2012-03-16

In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it.

The Social Outcast - Kipling D. Williams 2013-05-13

This book focuses on the ubiquitous and powerful effects of ostracism, social exclusion, rejection, and bullying. Human beings are an intrinsically gregarious species. Most of our evolutionary success is no doubt due to our highly developed ability to cooperate and interact with each other. It is thus not surprising that instances of interpersonal rejection and social exclusion would have an enormously detrimental impact on the individual. Until 10 years ago, however, social psychology regarded ostracism, rejection and social exclusion as merely outcomes to be avoided, but we knew very little about their antecedents and consequences, and about the processes involved when they occurred. Furthermore, the literatures of ostracism, social exclusion and rejection have not until now included discussions of the bullying literature.

Psychology - Sandra E. Hockenbury 2018-03-15

This acclaimed classroom favourite makes the science of psychology come alive for students, with personal stories that exemplify important concepts in a student-friendly way and coverage of the field's scientific foundations and advances. The substantially updated new edition extends the book's focus on developing scientific literacy in the context of

psychology, with new features in print and in the book's new online course space, LaunchPad. These features are the result of the book's most dramatic addition—Sandra Hockenbury's new writing partnership with co-author, Susan Nolan, who shares her belief that the introductory course can help all kinds of students develop a real understanding of psychology and lasting scientific literacy without sacrificing the field's research core. The book can also be purchased with the breakthrough online resource, LaunchPad, which offers innovative media content, curated and organised for easy assignability. LaunchPad's intuitive interface presents quizzing, flashcards, animations and much more to make learning actively engaging.

Theories of Personality - John Michael Berez 2008

Theories of Personality or Personality Psychology. In place of the historical, categorical, and research methods of teaching personality, Berez maps theories and research onto a grid that allows readers to analyze and compare. Instead of learning theoretical terms or analyzing research findings related to a particular theory, students will evaluate and compare personality constructs in different zones of interdisciplinary research. This approach facilitates both comprehension and retention, making sense of an encyclopedic volume of theories and research.

Basic Biomechanics - Susan J Hall 1991

Psychology - Henry Gleitman 2012

The Psychology of School Climate - Garry Wade McGiboney 2016-06-22

Many people have become impatient with school reform and school improvement efforts that fail to include school climate. The importance of a positive school climate is emerging in current research, not only as an essential component of school reform and school improvement, but also as a necessary framework for maintaining excellent schools and providing healthy and safe schools for all students. Research strongly suggests that educators and policy makers have a lot to learn about the importance of school climate for school safety and academic success. With the growing body of research regarding school climate, it is important to study the research and understand how the psychology of school climate and how the elements of school climate can be viewed from a population-based perspective, as well as understanding the impact of school climate on individual students. This review of school climate research includes hundreds of articles and research papers of

different perspectives from around the world in numerous cultures. School climate is becoming a science of education and psychology that must be studied further in order to understand the dynamic nature of learning environments, to identify elements that support or threaten the learning environment, and to learn how to improve the conditions for learning in all schools.

Real Essays with Readings - Susan Anker 2011-12-28

Real Essays delivers the powerful message that good writing, thinking, and reading skills are both essential and achievable. From the inspiring stories told by former students in Profiles of Success to the practical strategies for community involvement in the new Community Connections, Real Essays helps students to connect the writing class with their real lives and with the expectations of the larger world. So that students don't get overwhelmed, the book focuses first on the most important things in each area, such as the Four Most Serious Errors in grammar; the Four Basics of each rhetorical strategy; and the academic skills of summary, analysis, and synthesis. Read the preface.

The Biology of Human Starvation - Ancel Keys 1950

The Biology of Human Starvation was first published in 1950. Minnesota

Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. With great areas of the world battling the persistent and basic problem of hunger, this work constitutes a major contribution to needed scientific knowledge. The publication is a definitive treatise on the morphology, biochemistry, physiology, psychology, and medical aspects of calorie undernutrition, cachexia, starvation, and rehabilitation in man. Presented critically and systematically are the fact and theory from the world literature, including the evidence from World War II and the finding of the Minnesota Starvation Experiment (1944-1946). Pertinent experiments and field and clinical observations to 1949 are covered. The extensive original research involved was conducted at the University of Minnesota Laboratory of Physiological Hygiene, which Dr. Keys heads. The authors, all of the laboratory staff, were assisted in preparation of the work by Ernst Simonson, Samuel Wells and Angie Sturgeon Skinner.
