East Plays West - Stephen Wagg 2012-09-10

The Cold War spanned some five decades from the devastation that remained after World War Two until the fall of the Berlin wall, and for

much of that time the perception was that only on the Eastern side were politics and sport inextricably linked. However, this assumption underestimates the extent to which sport was an important symbol for both power blocs in their ongoing ideological struggle. This collection of essays from leading international authorities on sport, culture and ideology brings together an impressive body of work organized around key political themes and outstanding moments in sport, and is at once a political history of sport and an illuminating new perspective on the forces that shaped this unsettled time.

Creating a Class - Mitchell L. Stevens
2009-09-15

In real life, Mitchell Stevens is a professor in bustling New York. But for a year and a half, he worked in the admissions office of a bucolic New England college that is known for its high academic standards, beautiful campus, and social conscience. Ambitious high schoolers and savvy guidance counselors know that admission

here is highly competitive. But creating classes, Stevens finds, is a lot more complicated than most people imagine. Admissions officers love students but they work for the good of the school. They must bring each class in "on budget," burnish the statistics so crucial to institutional prestige, and take care of their colleagues in the athletic department and the development office. Stevens shows that the job cannot be done without "systematic preferencing," and racial affirmative action is the least of it. Kids have an edge if their parents can pay full tuition, if they attend high schools with exotic zip codes, if they are athletes--especially football players--and even if they are popular. With novelistic flair, sensitivity to history, and a keen eye for telling detail, Stevens explains how elite colleges and universities have assumed their central role in the production of the nation's most privileged classes. *Creating a Class* makes clear that, for better or worse, these schools now define the standards of

youthful accomplishment in American culture more generally.

Overcoming School Refusal - Joanne Garfi

2018-01-31

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term

consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

The author served Indian Maharajas for over 50 years accompanying them on their amorous trips to private retreats in India and abroad. He brilliantly recounts the extraordinary lives of the Maharanis of the richest Men the World has ever seen.

Higher Education Pathways - Ashwin, Paul 2018-12-14

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the

pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society.

Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Dynamic Consultation in a Changing Workplace - Edward B. Klein 2000

The authors examine the role of the consultant in assisting leaders to understand change from a dynamic systems perspective and to manage that change strategically. The case examples they present emphasize the need for consultants to connect the internal psychological landscapes of executives, managers, and employees with their external manifestations during times of organizational transformation, while remaining attuned to the impact of these issues on the consultant's own lives and work.

The New Realities - Peter Drucker 2012-08-21
The 'new realities' of the title refer to the state of government, society and the economy in the USA, Japan, Western Europe, Russia and the Third World. With characteristic authority and clarity of style, Drucker attempts to define the concerns, issues and controversies of today which will become the realities of the future. Already the bestselling author of many books on management and economics, Drucker has innumerable followers. Now turning to address

the changing demands of a post business society, the broad-ranging theme and vision of The New Realities will win him many more admirers.

Organizational Cognition - Theresa K. Lant 2000-07

Organizational Cognition is a collection of chapters written by scholars from around the world. The editors outline the history of two

approaches to the study of cognition in organizations, the computational approach and the interpretive approach. The chapters represent some of the most cutting-edge research on organizational cognition, covering research that spans many levels of analysis. Much of the work in the book demonstrates how computational and interpretive approaches can be combined in a way that provides greater insight into cognitive processes in and among organizations. The editors conclude by elaborating the likely boundary conditions of each approach and how they can be combined for a more complete understanding of cognition in organizations.

Pure Logistics - George Cyrus Thorpe 1917

Elite Business Schools - Mikael Holmqvist 2021-12-29

Social scientists are paying increasing attention to the business and financial elites: There's a great need to understand who these elites are,

what they do, and what makes them tick, as individuals but also as a class. By examining elite business schools, the institutions that train and prepare people to assume important leadership and decision-making positions in business, finance and related sectors, we may also learn how the economic elites are made. A key argument in this book is that elite schools are known to create powerful groups in society, offering them the intellectual and analytical means to act as leaders, but, most importantly, the social, moral and aesthetic skills that are deemed necessary to exercise power; in all essential respects elite schools consecrate people. By dominating much of higher education today, and by doing so in a way that creates and reproduces a market-based organization and control of society, elite business schools represent certain interests and ideologies that affect the lives of most people. In understanding how the modern economy is run, elite business schools, therefore, represent critical study

objects. This book, based on an in-depth study of the Stockholm School of Economics (SSE), offers a sociological analysis of the world of elite business schools. Specifically, this book examines the consecration of SSE's students from a number of perspectives and in a number of situations, focusing on student union activities, school culture, faculty behavior, teaching, courses and alumni events, noting the symbolic importance of economics and particularly the school's unique relation among the world's business schools to the Nobel Prize. The book addresses the topics with regards to the sociology of elites, management education and organizational studies and will be of interest to researchers, academics, and students also interested in business history, higher education studies, and sociology of education.

Managerial and Organizational Cognition
Eden 1998-03-19

Interest in the field of managerial and organizational cognition has been intense over

the last few years. This book explores and provides an in-depth overview of the latest developments in the area and presents answers to the questions accompanying its growth: Is the field distinctive? How does it extend our understanding of managerial processes? From different disciplinary perspectives and empirical settings, the contributors study patterns of managerial cognition. In particular, the longitudinal approach reflected in the volume contributes to its impact as a grounded, practice-based analysis of cognition in organizations.

How Firms Succeed - James P. Cramer 2002

This groundbreaking guide to successful management in architecture, engineering, and design, the culmination of a decade of work, combines practical solutions with business theory and an eye-opening treatise on the anatomy of leadership.

Leadership in Administration - Philip Selznick 2011-05-11

Foundational study of how institutions work and how leadership promotes them. Often cited in many fields and consistently assigned to classes in a variety of departments -- including sociology and business, and executive training in management and military leadership -- this book

is considered to have virtually created the modern field of institutional-leadership management. It is still recognized as a lively and accessible presentation of the institutionalist school's answer to traditional "rationalist" approaches. Selznick's analysis goes beyond efficiency and traditional loyalty: he examines the more nuanced variables of effective leadership of organizations in business, education, government, the military, and labor. Quality, authorized ebook format includes linked notes and Contents and embedded pagination from print editions for continuity of referencing and classroom adoptions across all platforms.

Changing Higher Education for a Changing World - Claire Callender 2020-08-20

Changing Higher Education for a Changing World draws on the outcomes of the cutting-edge research programmes of the UK-based Centre for Global Higher Education, the world's largest social science research centre focused on higher education and its future. In countries with incomes at European levels, the majority of all families now have connections to higher education, and there is widespread popular interest in how it can be made better. Together, the contributors sharply illuminate key issues of public and policy interest across the world: Do research universities make society more equal or more unequal? Are students graduating with too

much debt? Who do we want to be attending universities? Will learning technologies will abolish the need for bricks-and-mortar higher education institutions? What can countries do to improve their scientific performance? How can comparative teaching assessment and research assessment become much more effective? The book explores higher education in the major higher education regions including China, Europe, the UK and the USA.

C.G. Jung and Literary Theory - S. Rowland
1999-04-26

C.G. Jung and Literary Theory remedies a significant omission in literary studies by doing for Jung and poststructuralist literary theories what has been achieved for Freud and Lacan. Offering radically new Jungian theories of deconstruction, feminism, the body, sexuality, spirituality, postcolonialism, reader-response, the book also investigates the controversial occult and fascist heritage of Jung. By using the work of Derrida, Kristeva and Irigaray and examining Jungian fiction, this book transforms modern literary theory in ways which simultaneously critique Jung's work.

The Lines Between the Lines - Bess Rowen
2021-10-18

What is the purpose of a stage direction? These italicized lines written in between the lines of spoken dialogue tell us a great deal of information about a play's genre, mood, tone, visual setting, cast of characters, and more. Yet generations of actors have been taught to cross these words out as records of previous performances or signs of overly controlling playwrights, while scholars have either treated them as problems to be solved or as silent lines of dialogue. Stage directions can be all of these things, and yet there are examples from over one-hundred years of American playwriting that show that stage directions can also be so much more. *The Lines Between the Lines* focuses on how playwrights have written stage directions that engage readers, production team members,

and scholars in a process of embodied creation in order to determine meaning. Author Bess Rowen calls the products of this method “affective stage directions” because they reach out from the page and affect the bodies of those who encounter them. Affective stage directions do not tell a reader or production team what a given moment looks like, but rather how a moment feels. In this way, these stage directions provide playgrounds for individual readers or production teams to make sense of a given moment in a play based on their own individual cultural experience, geographic location, and identity-markers. Affective stage directions enable us to check our assumptions about what kinds of bodies are represented on stage, allowing for a greater multitude of voices and kinds of embodied identity to make their own interpretations of a play while still following the text exactly. The tools provided in this book are as useful for the theater scholar as they are for the theater audience member, casting director,

and actor. Each chapter covers a different function of stage directions (spoken, affective, choreographic, multivalent, impossible) and looks at it through a different practical lens (focusing on actors, directors, designers, dramaturgs, and readers). Every embodied person will have a slightly different understanding of affective stage directions, and it is precisely this diversity that makes these stage directions crucial to understanding theater in our time.

The Experience Economy - B. Joseph Pine 1999

You are what you charge for. And if you're competing solely on the basis of price, then

you've been commoditized, offering little or no true differentiation. What would your customers really value? Better yet, for what would they pay a premium? Experiences. The curtain is about to rise, say Pine Gilmore, on the Experience Economy, a new economic era in which every business is a stage, and companies must design memorable events for which they charge admission. With The Experience Economy, Pine Gilmore explore how successful companies-using goods as props and services as the stage-create experiences that engage customers in an inherently personal way. Why does a cup of coffee cost more at a trendy cafe than it does at the corner diner or when brewed at home? It's the value that the experience holds for the individual that determines the worth of the offering and the work of the business. From online communities to airport parking, the authors draw from a rich and varied mix of examples that showcase businesses in the midst of creating engaging experiences for both

consumers and corporate customers. The Experience Economy marks the debut of an insightful, highly original, and yet eminently practical approach for companies to script and stage compelling experiences. In doing so, all workers become actors, intentionally creating specific effects for their customers. And it's the experiences they stage that create memorable-and lasting-impressions that ultimately create transformations within individuals. Make no mistake, say Pine Gilmore: goods and services are no longer enough. Experiences are the foundation for future economic growth, and The Experience Economy is the playbook from which managers can begin to direct new performances. NTNTNT - 2003-01-01
