The SAGE Encyclopedi a of Contemporary Early Childhood Education Donna Couchenour 2016-03-15
The general public often views early childhood education as either simply “babysitting” or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early

Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development - physical, cognitive, language, social, emotional, aesthetic - as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?

Teaching and Learning in the Early Years - David Whitebread 2008-03-06

How can we help children to become independent learners? The third edition of this invaluable companion for Early Years practitioners provides a broad-ranging and up-to-date review of current thinking and best practice within Foundation Stage and Key Stage 1 education. Based on the basic truth that an effective Early Years curriculum must start with the children, this book focuses on their needs and their potential. The best teaching must have a strong element of fun, wonder and excitement: David Whitebread and Penny Coltman show how play is a crucial part of this. Each chapter combines a review of important principles with practical and inspiring classroom examples. This third edition has been fully revised and updated in light of the introduction of the Early Years Foundation Stage, and includes completely new chapters concerned with classroom organisation to support independent learning, outdoor learning, speaking and listening and mathematics in the early years. The authors review all major areas of the Foundation Stage and Key Stage 1 curriculum and a range of basic issues and principles, including: an analysis of

current research into how children learn discussions of general issues such as classroom organisation, curriculum management, and assessment a detailed section on play and language chapters covering individual curriculum areas across all six Foundation Stage areas of learning and across the areas of the Key Stage 1 National Curriculum The book is essential reading for all Foundation Stage and Key Stage 1 trainee teachers, their tutors and mentors, and serving teachers working with children in the three to seven age range wishing to reflect upon and develop their practice.

The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival--demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will

find the video an indispensable tool for explaining appropriate practice.

Generation Z - Victoria Carrington 2015-12-17

This book argues that the mythic figure of the zombie, so prevalent and powerful in contemporary culture, provides the opportunity to explore certain social models - such as 'childhood' and 'school', 'class' and 'family' - that so deeply underpin educational policy and practice as to be rendered invisible. It brings together authors from a range of disciplines to use contemporary zombie typologies - slave, undead, contagion - to examine the responsiveness of everyday practices of schooling such as literacy, curriculum and pedagogy to the new contexts in which children and young people develop their identities, attitudes to learning, and engage with the many publics that make up their everyday worlds.

Multi-Tiered Systems of Support in Elementary Schools - Alison G. Clark 2019-12-20

Multi-Tiered Systems of Support in Elementary Schools is the leadership handbook and practitioner's field guide to implementation of Multi-Tiered Systems of Support (MTSS) in elementary schools, leading to improved student outcomes and school safety. Schools can creatively customize replicable best practices using this in-depth operations manual to guide MTSS teams in planning and delivering tiers of academic and integrated social-emotional and behavioral supports to meet the needs of all students. This text introduces Healthy Minds, Safe Schools, an evidence-based program that significantly improves student well-being, school safety, and teacher feelings of self-efficacy for delivering social-emotional and behavioral curriculum in the classroom. Featuring team exercises and real perspectives from educators, this text shows how to make incremental yet manageable changes at elementary schools in accordance with public policy mandates and evidence-based practices by developing smart teams and programs, identifying roles and responsibilities, implementing layers of academic support and services, improving social-emotional and behavioral health of students, and creating an inclusive school culture. It details

organizational psychology and socially just educational practices and is a handbook aligned with the U.S. Secret Service National Threat Assessment Center guidebook for preventing school violence and with the National Center for School Mental Health Curriculum

Eager to Learn - National Research Council 2001-01-22

Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers and learners every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? Eager to Learn explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with

disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. Eager to Learn presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

This book, first published in 1992, provides an overview of programs for young children in countries and territories of the Pacific Rim. It focuses on programs which precede the beginning of formal schooling and that are part of the institutional structure of the country. The term early childhood education is used in a broad sense, and refers to education and care. The contributors to this volume have extensive knowledge and experience of early education in the countries that they write about.

EBOOK: International Perspectives on Early Childhood Education and Care - Jan

Georgeson 2013-02-16

There is a growing interest in understanding how early years care and education is organised and experienced internationally. This book examines key influential approaches to early years care as well as some less well-known systems from around the world. In particular the book aims to: Inform those studying early years about perspectives in other countries Encourage critical thinking about issues, influences and the complexities of early years provision around the world Promote critical reflection on students' own provision and the current context of that provision Each chapter provides an overview of early years provision and explores historical and current influences in context, as well as offering insights into daily life through short vignettes, longer case studies and commentary from practitioners. Whilst many approaches - such as Reggio Emilia, Te Whariki and Head Start - are widely admired, it is important for reflective practitioners to understand the motivation which

gave rise to these influential approaches in their original context. Additionally, broadening understanding through information on less widely known systems, the book provides students with a good grounding in the international context of early years, the provenance of different early years approaches and principles, and the influences on their own countries' provision. Written in a straightforward and accessible style, the book is designed to meet the needs of students studying modules related to international perspectives on a range of foundation, bachelor and master's degrees in early years. Contributors: Verity Campbell-Barr, Federica Caruso, Carmen Dalli, Rebecca Carter Dillon, Annie Davy, Chandrika Devarakonda, Alena Drzalová, Hasina Banu Ebrahim, Susan Edwards, Dora Ho, Valerie Huggins, Anne Hunt, Kerstin Kööp, Éva Kovácsné Bakoski, Caroline Leeson, Beth Marshall, Nancy McDermott, Julia Morgan, Joce Nutall, Elin Eriksen Ødegaard, Philip Selbie, Paolo Sorzio, Manabu Sumida, Keang-ieng (Peggy) Vong, Karen Wickett "The book rightly challenges common assumptions about the value of Western perspectives of ECEC and skilfully enables the reader to recognize the various social, political and economic drivers and processes that have shaped early years pedagogy on a global level." Dr Janet Rose, Early Years Education Award Leader, Bath Spa University, UK "Given the ever increasing interest and importance of global early childhood education and care, this critically informed book offers valuable and challenging internationalised comparative arguments for students and academics at all levels." Dr Guy Roberts-Holmes, Senior Lecturer, Early Years and Primary Education Department, University of London, UK

Paradigm Shifts in 21st Century Teaching and Learning - Orakc?, ?enol 2020-04-24

One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students. The system in which the student is passive and the teacher is active is no longer the most effective form of education. Additionally, with the increased availability to information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote

effective teaching practices. *Paradigm Shifts in 21st Century Teaching and Learning* is an essential scholarly publication that examines new approaches to learning and their application in the teaching-learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers, researchers, education professionals, administrators, academicians, educational policymakers, and students.
