Bread Revolution - Peter Reinhart 2014-10-21

Renowned baking instructor, and author of *The Bread Baker's Apprentice*, Peter Reinhart explores the cutting-edge developments in bread baking, with fifty recipes and formulas that use sprouted flours, whole and ancient grains, nut and seed flours, alternative flours (such as teff and grape skin), and allergy-friendly and gluten-free approaches. A new generation of bakers and millers are developing innovative flours and baking techniques that are designed to extract the grain's full flavor potential—what Reinhart calls “the baker's mission.” In this lushly photographed primer, Reinhart draws inspiration from these groundbreaking methods to create master recipes and formulas any home baker can follow, including Sprouted Sandwich Rye Bread, Gluten-Free Many-Seed Toasting Bread, and Sprouted Wheat Croissants. In many instances, such as with sprouted flours, preferments aren't necessary because so much of the flavor development occurs during the sprouting phase. For grains that benefit from soakers, bigas, and sourdough starters, Reinhart provides the precise guidance that has made him such a trusted expert in the field. Advanced bakers will relish Reinhart's inventive techniques and exacting scientific explanations, while beginning bakers will rejoice in his demystification of ingredients and methods—and all will come away thrilled by bread's new frontier. *Correction to the Sprouted Whole Wheat Bread recipe on page 63: The volume measure of water should be 1 ¾ cups plus 1 tablespoon, not 3 ¼ cups.

The Daily Trading Coach - Brett N. Steenbarger 2009-03-16

The Earth and Its Peoples: A Global History - Richard Bulliet 2014-01-01

Featuring a beautiful new design, THE EARTH AND ITS PEOPLES, Sixth Edition, presents world history in a balanced, global framework, shifting the focus away from political centers of power. This truly global text for the world history survey course employs fundamental themes of “environment and technology” and

“diversity and dominance” to explore patterns of humans' interactions with their surroundings and with each other. The authors' approach reveals how humanity continues to shape and be shaped by the environment and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Highly acclaimed in their fields of study, the authors bring a wide array of expertise to the program. A combination of strong scholarship and detailed pedagogy gives the book its reputation for rigor and student accessibility. First Class Fatherhood Alec Lace 2022-04-12

Did you know that in the United States alone, more than one in four children live in a home without a father? When Alec Lace recognized this crisis and launched his parenting podcast 2018, his mission was simple: to give dads an opportunity to encourage others, by sharing the experiences and wisdom they've gained during their respective journeys. A few years and hundreds of interviews later--including with many high-profile dads from sports, media, politics, the military, and other industries--Alec has curated a rich collection of anecdotes that provides guidance and inspiration on a wide array of topics, including but not limited to Advice for about-to-be or new dads Finance and education Discipline Dating and social life Faith, values, and service Fitness and health, for both children and fathers How to be a fatherhood ambassador First Class Fatherhood will engage the reader with thought-provoking ideas and realistic solutions from fathers who have been through it all. Alec believes that being a father is the most important role a man can play in the game of life. And his hope is that this book will help change the narrative of fatherhood and family life, and greatly reduce the number of children growing up without a father in the home.

Deer Hunting with Jesus - Joe Bageant 2008-06-24

Years before *Hillbilly Elegy* and *White Trash*, a raucous, truth-telling look at the white working poor -- and why they have learned to hate liberalism. What it adds up to, he asserts, is an unacknowledged class war. By turns tender, incendiary, and seriously funny, this book is a call to arms for fellow progressives with little real understanding of "the great beery, NASCAR-loving, church-going, gun-owning America that has never set foot in a Starbucks." *Deer Hunting with Jesus* is Joe Bageant's report on what he learned when he moved back to his hometown of Winchester, Virginia. Like countless American small towns, it is fast becoming the bedrock of a permanent underclass. Two in five of the people in his old neighborhood do not have high school diplomas or health care. Alcohol, overeating, and Jesus are the preferred avenues of escape. He writes of: • His childhood friends who work at factory jobs that are constantly on the verge of being outsourced • The mortgage and credit card rackets that saddle the working poor with debt • The ubiquitous gun culture—and why the left doesn't get it • Scots Irish culture and how it played out in the young life of Lyndie England

Glazing Techniques Joaquim Chavarría 1998

This book gives both a broad overview of glazes and details specifics about them. It discusses preparation, adapting glazes to ceramic mixtures, firing, cooling, glazing with a brush, with a spraygun, handling defects and corrections, finishing processes, and using a crucible and kiln. The glazes reviewed included

crystalline, raku, salt, and crackle.

The Cult of Smart - Fredrik deBoer 2020-08-04

Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

The Captain Class - Sam Walker (Newspaper editor) 2017

"The captain class" draws on a lifetime of sports spectatorship and two decades of sports reporting to tell the surprising story of what makes teams exceptional. Sam Walker had been searching for the sporting holy grail, a unifying theory of what makes teams win when he discovered certain similarities in cases of sustained greatness in teams across a number of sports. They were all lead by a certain type of captain, but not one with the characteristics you might expect. They were unorthodox outliers - disagreeable, marginally skilled, hot-headed, occasionally unhinged, athletically sub-par, poor verbal communicators, while off the field they were private loners who avoided the limelight

How I Became a Quant - Richard R. Lindsey 2011-01-11

Praise for How I Became a Quant "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, How I Became a Quant details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you?the?chance to learn firsthand what it's like to be a?quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

Understanding Management in China - Malcolm Warner 2013-11-12

China has become one of the fastest-growing economies ever seen in the world in recent times. In the last three decades, China has transformed itself from a command economy to a market one, albeit a nominally socialist one, and its management systems have been reformed accordingly. In the light of these changes, Malcolm Warner, one of the leading authorities on management in China, explores the past, present and future of Chinese management. The first part of the work examines the history of management practices in the 'Middle Kingdom', outlining the influence of traditional Chinese values, especially the Confucian inheritance, and the legacy of the imperial bureaucracy with its meritocratic examination system, as well as the role of industrialization and the influx of foreign-owned businesses in the late nineteenth century and the twentieth century. It next goes on to consider the current state of China's management, showing how a new breed of manager has evolved since the beginning of Deng Xiaoping's reforms in the late 1970s and 1980s. The resulting impact of this strategy which has continued into the 1990s and the 2000s, up to the present day, is then examined. The final part of the book concludes with reflections on how management in China is likely to develop in the near future, especially on how far it will converge with global practices or to what degree an indigenous form of management 'with Chinese characteristics' will prevail.

Global Objects - Edward S. Cooke 2022-09-13

A bold reorientation of art history that bridges the divide between fine art and material culture through an examination of objects and their uses Art history is often viewed through cultural or national lenses that define some works as fine art while relegating others to the category of craft. Global Objects points the way to an interconnected history of art, examining a broad array of functional aesthetic objects that transcend geographic and temporal boundaries and challenging preconceived ideas about what is and is not art. Avoiding traditional binaries such as East versus West and fine art versus decorative art, Edward Cooke looks at the production, consumption, and circulation of objects made from clay, fiber, wood, and nonferrous base metals. Carefully considering the materials and process of making, and connecting process to product and people, he demonstrates how objects act on those who look at, use, and acquire them. He reveals how objects retain aspects of their local fabrication while absorbing additional meanings in subtle and unexpected ways as they move through space and time. In emphasizing multiple centers of art production amid constantly changing contexts, Cooke moves beyond regional histories driven by geography, nation-state, time period, or medium. Beautifully illustrated, Global Objects traces the social lives of objects from creation to purchase, and from use to experienced meaning, charting exciting new directions in art history.

The Man Who Solved the Market - Gregory Zuckerman 2019-11-05

NEW YORK TIMES BESTSELLER Shortlisted for the Financial Times/McKinsey Business Book of the Year Award The unbelievable story of a secretive mathematician who pioneered the era of the algorithm--and made \$23 billion doing it. Jim Simons is the greatest money maker in modern financial history. No other investor--Warren Buffett, Peter Lynch, Ray Dalio, Steve Cohen, or George Soros--can touch his record. Since 1988, Renaissance's signature Medallion fund has generated average annual returns of 66 percent. The firm has earned profits of more than \$100 billion; Simons is worth twenty-three billion dollars. Drawing on unprecedented access to Simons and dozens of current and former employees, Zuckerman, a veteran Wall Street Journal investigative reporter, tells the gripping story of how a world-class mathematician and former code breaker mastered the market. Simons pioneered a data-driven, algorithmic approach that's sweeping the world. As Renaissance became a market force, its executives began influencing the world beyond finance. Simons became a major figure in scientific research, education, and liberal politics. Senior executive Robert Mercer is more responsible than anyone else for the Trump presidency, placing Steve Bannon in the campaign and funding Trump's victorious 2016 effort. Mercer also impacted the campaign behind Brexit. The Man Who Solved the Market is a portrait of a modern-day Midas who remade markets in his own image, but failed to anticipate how his success would impact his firm and his country. It's also a

story of what Simons's revolution means for the rest of us.

Importing Into the United States - Border Protection U S Customs and 2015-10-12

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.
