Human Resource Development in South Korea - Doo Hun Lim

2020-10-28

Winner of the 2020 R. Wayne Pace HRD Book of the Year Award, this edited book covers major trends, notable distinctions, and the challenges and needs for preparing future HRD activities in South Korea. It consists of three major sections: national and social issues of HRD, sector perspectives on HRD, and contemporary issues and trends. To cover contemporary trends and future issues, authors examine topics in diverse areas, such as the application of data analytics for HRD, action learning trends, and psychological and work climate issues affecting performance. Through theory and cases, this book will show how HRD can be successful at the organizational, industrial, and societal levels as well as the future needs required to further advance HRD in the nation.

Foreign Direct Investment in Latin America and the Caribbean

2018 - United Nations 2019-01-30

This publication sets out and analyses the main foreign direct investment (FDI) trends in the countries of Latin America and the Caribbean. In 2017, certain trends that had already emerged in the global economic landscape became more established. In particular, announcements of potential restrictions on trade and pressures to relocate production to developed countries were confirmed. At the same time, China has taken steps to restrict outflows of foreign direct investment (FDI) in order to align these flows with its strategic plan. Adding to these factors is the

expansion of digital technologies, whose international expansion requires smaller investments in tangible assets. Firms in these areas are heavily concentrated in the United States and China, which reduces the need for cross-border mergers and acquisitions.

Winning at the Turning Point - Fulin Chi 2019-10-09

This book by influential policymaker Chi Fulin lays out in issue-oriented and detailed chapters, at a time when China is at a crossroads, exactly how the government plans to deal with the social, political and economic issues the world's second-largest economy faces. From managing the decline of industry, to urbanization, to managing consumption, to social security and education, Chi offers a roadmap for the years ahead. This book will be particularly fascinating to Western scholars of China who speculate on the inner workings of the Chinese policymaking elite, with the ambition of China's central planners here laid out for the world to see.

Advances in Production Management Systems: Innovative and Knowledge-Based Production Management in a Global-Local World

Bernard Grabot 2014-08-26

The three volumes IFIP AICT 438, 439, and 440 constitute the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2014, held in Ajaccio, France, in September 2014. The 233 revised full papers were carefully reviewed and selected from 271 submissions. They are organized in 6 parts:

knowledge discovery and sharing; knowledge-based planning and scheduling; knowledge-based sustainability; knowledge-based services; knowledge-based performance improvement, and case studies.

China and Global Value Chains - Yutao Sun 2017-12-15

President Trump has raised the intriguing question of bringing the manufacturing of companies like Apple back from China to the U.S. This book, however, argues that in this age of the knowledge-based economy and increased globalization, that value creation and distribution based on knowledge and innovation activities are at the core of economic development. The double-edged sword of globalization has transformed China's economic development in the past few decades. Although China has benefitted from globalization and is now the second largest economy in the world, having become a global manufacturing power and the biggest exporter of high-tech products, it continues to be highly dependent on foreign sources of capital and technology. This book will explore the core of the Chinese economy from the perspective of the Global Value Chain (GVC), combining analysis of inward investment, international trade, Science and Technology and Innovation (S&TI) and economic development. Specifically, it investigates China's evolving role in GVCs with some innovative Chinese companies emerging in the global market and China's ongoing efforts to become an innovation-driven economy. China's impressive economic record and experience provides an impressive role model for other developing countries.

Advances in Efficiency and Productivity - Juan Aparicio 2016-12-23

This book grows from a conference on the state of the art and recent advances in Efficiency and Productivity. Papers were commissioned from leading researchers in the field, and include eight explorations into the analytical foundations of efficiency and productivity analysis. Chapters on modeling advances include reverse directional distance function, a new method for estimating technological production possibilities, a new distance function called a loss distance function, an analysis of productivity and price recovery indices, the relation of technical efficiency measures to productivity measures, the implications for benchmarking and target setting of imposing weight restrictions on DEA

models, weight restrictions in a regulatory setting, and the Principle of Least Action. Chapters on empirical applications include a study of innovative firms that use innovation inputs to produce innovation outputs, a study of the impact of potential "coopetition" or cooperation among competitors on the financial performance of European automobile plants, using SFA to estimate the eco-efficiency of dairy farms in Spain, a DEA bankruptcy prediction model, a combined stochastic cost frontier analysis model/mixture hazard model, the evolution of energy intensity in nine Spanish manufacturing industries, and the productivity of US farmers as they age.

Reshaping India in the New Global Context - Subhash C. Jain 2017-10-27

This book traces the history of India's progress since its independence in 1947 and advances strategies for continuing economic growth. Insiders and outsiders that have criticized India for slow economic growth fail to recognize all it has achieved in the last seven decades, including handling the migration of over 8 million people from Pakistan, integrating over 600 princely states into the union, managing a multi-language population into one nation and resolving the food problem. The end result is a democratic country with a strong institutional foundation. Following the growth strategies outlined in the book and with a strong leadership, India has the potential to stand out as the third largest economy in the world in the next 25 to 30 years. Subhash Jain and Ben Kedia delve into India's development and emergence as an economic power, one of the three countries that can make its own supercomputers, one of the six countries that can launch satellites and that has the second largest small car market in the world. They discuss its need for innovative initiatives and top leadership to pursue an agenda of economic growth, and monitored policies to encourage entrepreneurship at all levels. With an emphasis on the new leadership of Prime Minister Modi, the book identifies policies that need to be adopted to make India's future bright and prosperous. This book is a critical resource for students and scholars interested in India and invested in its progress, as well as policymakers, government officials and corporations considering India as a place to expand and do business.

The Rise of China Douglas C. Lovelace, Jr. 2015-11-05

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 139, *The Rise of China*, examines the strategic implications of China's increasing economic and military power for the international community. Regional and global reactions to the growth of Chinese economic investment and property acquisitions are considered, along with responses to border disputes and other contentious regional issues. The documents in this volume include several reports and studies prepared by the U.S.-China Economic and Security Commission, examining such topics as: the evolving state of the overall military relationship between the U.S. and China; the development of China's Navy; China's establishment of an Air Defense Identification Zone (ADIZ); Chinese legal views on cyberspace and cybersecurity; general trends in U.S.-Chinese science and technology cooperation; and the impact of Chinese economic development on the United States.

Marketing 2018, Loose-Leaf Version - William M. Pride 2018-10-11

MARKETING is a thorough overview of essential marketing principles in a visually engaging presentation. This popular resource helps you develop the knowledge and decision-making skills to succeed.

MARKETING offers in-depth coverage of fundamental marketing concepts and strategies, plus practical applications and real-world examples, including material on social networking, digital marketing, social and environmental responsibility, globalization, entrepreneurship, and marketing in times of transition. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

America in the Age of Trump Douglas E. Schoen 2018-10-23

America in the Age of Trump is a bracing, essential look at the failure of a great nation to meet the needs of its people and the challenges of the age—and the resulting collapse of public trust in government, as well as a pervasive crisis of national values, from broken families to a loss of

faith in the American idea itself. This crisis of values occurs just as the country faces an unprecedented array of fiscal, economic, social, and national-security challenges: out-of-control federal spending, frighteningly large deficits, massive gaps of income and opportunity, cultural division, and a dangerous world in which American power seems increasingly incidental. In *America in the Age of Trump*, Douglas E. Schoen and Jessica Tarlov offer a definitive and unique assessment of a nation in turmoil, looking beneath well-known problems to identify underlying yet poorly understood causes. Readers will confront the crises, one by one: of trust, values, and governance; of education, economic opportunity, and fiscal solvency; of national security, domestic tranquility, and race relations. *America in the Age of Trump* gathers in one place a clear and comprehensive evaluation of the fundamental issues confronting the American future while offering bold, fresh approaches to meeting these challenges. Other books have described the specter of American decline, but none has been so comprehensive in its diagnosis or forward-looking—and non-ideological—in its remedies, explaining how we might yet overcome national self-doubt to reclaim our traditional optimism, reassert our place in the world, and secure a prosperous future for our citizens.

Adaptive and Adaptable Learning Katrien Verbert 2016-09-06

This book constitutes the proceedings of the 11th European Conference on Technology Enhanced Learning, EC-TEL 2016, held in Lyon, France, in September 2016. The 26 full papers, 23 short papers, 8 demo papers, and 33 poster papers presented in this volume were carefully reviewed and selected from 148 submissions.

Rising to the Challenge - National Research Council 2012-08-06

America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military power in the post-war. No longer is U.S. pre-eminence assured as a place to turn laboratory discoveries into new commercial products, companies, industries, and high-paying jobs. As the pillars of the U.S. innovation system erode through wavering financial and policy support, the rest of the world is racing to improve its capacity to generate new technologies

and products, attract and grow existing industries, and build positions in the high technology industries of tomorrow. Rising to the Challenge: U.S. Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security, its role as a world power, and the welfare of its people. The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage. To this end, both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics. The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States. This report argues that far more vigorous attention be paid to capturing the outputs of innovation - the commercial products, the industries, and particularly high-quality jobs to restore full employment. America's economic and national security future depends on our succeeding in this endeavor.

The Disruptive Fourth Industrial Revolution - Wesley Doorsamy
2020-07-13

The book explores technological advances in the fourth industrial revolution (4IR), which is based on a variety of technologies such as artificial intelligence, Internet of Things, machine learning, big data, additive printing, cloud computing, and virtual and augmented reality. Critically analyzing the impacts and effects of these disruptive technologies on various areas, including economics, society, business, government, labor, law, and environment, the book also provides a broad overview of 4IR, with a focus on technologies, to allow readers to gain a deeper understanding of the recent advances and future trajectories. It is intended for researchers, practitioners, policy-makers and industry leaders.

China's Path of Industrialization - Beo Jin
2020-01-23

This book reviews China's industrialization from the perspective of inclusiveness, and discusses the challenges arising from its industrialization process and how the Chinese people view and seek to

overcome these challenges. By examining China's industrialization in the context of the global economy, it reveals how China should be further integrated into and contribute to the great endeavor of worldwide industrialization and human development in the new era of economic globalization, allowing it to become a responsible stakeholder through its national rejuvenation for the benefit of the entire world.

U.S. International Economic Strategy in a Turbulent World -

Howard J. Shatz 2016-06-21

This report presents strategic choices America faces regarding the international economy over the term of the next U.S. administration, focusing on policy choices in the areas of maintaining and improving the rules-based international economic system; working with China and better integrating it into the existing system; supporting economic growth of allies and partners; and using sanctions to change unwanted behavior and counter adversaries.

Opportunities in Emerging Markets - Gordian Gaeta 2012-11-27

The practical guide to investing in emerging markets Though potentially risky, investing in emerging markets can offer extremely attractive returns. Opportunities in Emerging Markets offers practical advice for investors based on the real life experiences—both positive and negative—of practitioners, pioneer investors, and local heroes with experience in frontier markets. Exploring how every developing market has its own unique regional cultures and social structures that change the way investors invest, and must be understood in order to make wise investments, the book combines standard approaches to investing with the exigencies of frontier markets to create an invaluable framework for success. A collection of useful ideas that investors—institutions, general partners, limited partners, or shareholders—can draw upon when investing money in emerging markets, the book includes essential information on one of the most attractive opportunities for beating traditional markets and investments. If access, downside, and predictability can be managed, there's a great deal of money to be made in emerging markets, and this book shows how. Both investors and investment managers need to understand fundamental success factors,

real framework conditions, and hidden pitfall and in Opportunities in Emerging Markets, author Gordian Gaeta analyses these intricacies in depth. Gives investors of all kinds the information they need to succeed in emerging markets Incorporates real life experiences—both good and bad—to help readers avoid common mistakes and maximize their returns Includes interviews with Mark Mobius, Jim Rogers, Marc Faber, and other leading names in the emerging markets sector For those traders brave enough to engage in high-risk/high-return investing, Opportunities in Emerging Markets is an excellent overview of the world's toughest frontier markets and how to conquer them. Featuring interviews with some of the top investors in the field, this is the definitive guide to the perils and pitfalls of investing in these highly volatile markets.

The Transformation Myth - Gerald C. Kane 2021-09-28

In this business bestseller, how companies can adapt in an era of continuous disruption: a guide to responding to such acute crises as COVID-19. Gold Medalist in Business Disruption/Reinvention. When COVID-19 hit, businesses had to respond almost instantaneously—shifting employees to remote work, repairing broken supply chains, keeping pace with dramatically fluctuating customer demand. They were forced to adapt to a confluence of multiple disruptions inextricably linked to a longer-term, ongoing digital disruption. This book shows that companies that use disruption as an opportunity for innovation emerge from it stronger. Companies that merely attempt to "weather the storm" until things go back to normal (or the next normal), on the other hand, miss an opportunity to thrive. The authors, all experts on business and technology strategy, show that transformation is not a one-and-done event, but a continuous process of adapting to a volatile and uncertain environment. Drawing on five years of research into digital disruption—including a series of interviews with business leaders conducted during the COVID-19 crisis—they offer a framework for understanding disruption and tools for navigating it. They outline the leadership traits, business principles, technological infrastructure, and organizational building blocks essential for adapting to disruption, with examples from real-

world organizations. Technology, they remind readers, is not an end in itself, but enables the capabilities essential for surviving an uncertain future: nimbleness, scalability, stability, and optionality.

Chalta Hai India - Alpesh Patel 2018-10-18

India once commanded a massive 30 per cent share of the global GDP and led the world in most fields, but today the country sadly is a developing nation. People often attribute India's sluggish progress to the malaise called the Chalta Hai ('It's okay', 'Let it be') attitude, but not everyone agrees with that presupposition. Debates on the subject are often inconclusive and discomfiting questions remain unanswered. Are we really a Chalta Hai nation? Is Chalta Hai ingrained in our DNA or is it just a bad habit which can be easily exterminated? Will this attitude stop India from becoming a global power? Alpesh Patel delves into this quirky Indian approach and answers these questions by examining the country's pace of progress in fields such as education, infrastructure, films and sports since Independence. The book revisits our cultural, ideological and political history over three millennia to trace the roots of the Chalta Hai attitude of Indians. Interesting facts and unsettling inferences force the reader to introspect and awaken him to the need for an urgent action. Finally, the book charts out methods and suggestions on how to get rid of the Chalta Hai attitude and take India closer to the dream of becoming a developed nation.

Socio-economic Systems: Paradigms for the Future - Elena G. Popkova 2021-03-05

This book is reflective of a science-based vision of the future development paradigm of economic and social systems. It deals with the digitization as the technological basis for the future development of economic and social systems and presents a review of groundbreaking technologies and prospects for their application. The specific character of the industry and prospects for the application of digital technologies in business are analyzed. A rationale is provided for future prospects for the sustainable development of economic and social systems in a digital economy. The authors determine the process of the formation and development of the information-oriented society, social and educational

aspects of the digitization, as well as the institutional framework of the digital future of social and economic systems. The book combines the best works following the results of the 12th International Research-to-Practice Conference “Artificial Intelligence: Anthropogenic Nature vs. Social Origin” that was held by the Institute of Scientific Communications (ISC) in cooperation with the Siberian Federal University and the Krasnoyarsk Regional Fund of support of scientific and scientific-technical activities on 5–7 December 2019, in Krasnoyarsk, Russia, as well as following the results of the 3rd International Research-to-Practice Conference “Economic and Social Systems: Paradigms for the Future” that was held by the ISC in cooperation with the Pyatigorsk State University on 5–6 February 2020. The target audience of the book consists of representatives of the academic community concerned with the future prospects for the development of economic and social systems, as well as economic agents engaged in the digitization of business processes, and representatives of public agencies regulating the development of business systems for their progressivity, sustainability and competitiveness.

Marketing 2016 - William M. Pride 2015-01-12

Pride and Ferrell's *MARKETING 2016* provides a thorough overview of essential marketing principles within a visually engaging, reader-friendly presentation. This popular, proven text helps students develop the knowledge and decision-making skills they need to succeed in today's competitive business environment. *MARKETING 2016* delivers in-depth coverage of fundamental marketing concepts and strategies, along with practical applications and real-world examples, including up-to-date material on social networking, digital marketing, social and environmental responsibility, globalization, entrepreneurship, and marketing in times of transition. Perfect for students of all backgrounds and interest levels, *MARKETING 2016* is an essential resource for classroom and career success. Important Notice: Media content referenced within the product

description or the product text may not be available in the ebook version.
Budgeting for Sustainable Development - Jayome B. McKinney 2017-11-15

This book provides critical insights about how U.S. policymaking is likely to be imperiling America's future, and how only the most efficient and productive organizations and governments will reap globalization's greatest rewards. Vital areas such as vocational training, manufacturing, infrastructure, sustainable debt creation and the STEM worker shortage crisis are extensively examined and innovative solutions are proposed. Twenty-seven common-good indicators are presented for assessing policymaking, aimed at providing maximum transparency and accountability.

The Art of War in an Age of Perils - Michael O'Hanlon 2021-05-25

An informed modern plan for post-2020 American foreign policy that avoids the opposing dangers of retrenchment and overextension. Russia and China are both believed to have “grand strategies”—detailed sets of national security goals backed by means, and plans, to pursue them. In the United States, policy makers have tried to articulate similar concepts but have failed to reach a widespread consensus since the Cold War ended. While the United States has been the world's prominent superpower for over a generation, much American thinking has oscillated between the extremes of isolationist agendas versus interventionist and overly assertive ones. Drawing on historical precedents and weighing issues such as Russia's resurgence, China's great rise, North Korea's nuclear machinations, and Middle East turmoil, Michael O'Hanlon presents a well-researched, ethically sound, and politically viable vision for American national security policy. He also proposes complementing the Pentagon's set of “4+1” pre-existing threats with a new “4+1”: biological, nuclear, digital, climatic, and internal dangers.

Global Business - Yongsun Paik 2017-05-08

This textbook is designed to help students understand the key issues of global business by connecting theory with reality. Divided into three parts, it covers critical issues of international business, introducing readers to topics they will connect with, and discussing core concepts. With a user-friendly pedagogy and a host of helpful visuals, the authors

offer a practitioner's perspective on global business knowledge, examining familiar theory on trade, direct investment, and political environment alongside fresh topics, like geopolitical conflicts, emerging markets, and sustainability. Over sixty case studies are included to illustrate the magnitude and complexity of global business involving different stakeholders. Undergraduate students looking for an introduction to international business and graduate students looking to apply their knowledge will find Global Business stimulating, since it demonstrates how theories and concepts work in real-world business settings.

India: Preparation for the World of Work - Matthias Pilz 2016-01-27

This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market - because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research. *India in America* - United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Commerce, Manufacturing, and Trade 2011

Doing Business in Korea - Fabian Jintae Froese 2019-08-19

Much of the existing research looks at the outflow of companies and people from Korea to foreign countries, whilst less is known about foreign firms and workers in Korea. Considering the immense interest of both academics and practitioners in the business opportunities in Korea, this book provides a comprehensive overview of doing business in Korea and recommendations on how foreign companies and individuals can succeed in this market. This book covers a wide range of relevant topics, including the Korean business environment, market entry into Korea, management issues and entrepreneurship in Korea. This is a must-read for anyone interested in or already doing business in Korea.

Assessing and Mitigating Business Risks in India - Balbir B. Bhasin 2012-07-20

India, one of the world's fastest-growing large economies, offers business and investment opportunities across a multitude of sectors. More and more companies around the world are eager to do business in India. This book details the challenges and risks involved as well as providing real

suggestions for overcoming them. It begins by providing a background to understanding India and highlights the business environment in which the economic, legal, and cultural variances exist. Potential markets are then discussed, focusing on the sectors, regions, and cities where growth is taking place; the upper, middle, and lower income segments; Indian MNEs; public sector and state-owned companies, and family-owned enterprises. Throughout the book, the author examines the various pitfalls and obstacles that are frequently encountered when operating in India, including political uncertainty and intransigence, corruption, bureaucratic roadblocks, the web of litigation, protecting intellectual property, labor and human resources limitations, and India's ubiquitous second economy. These not only increase risk and lead to costly delays on account of lengthy litigation and payment of bribes, aggravating frustration, but may also result in total loss of investments. The book concludes by providing keys to success, including guidelines for selecting partners and appointing agents, as well as negotiating techniques that work in India. It also includes a comprehensive list of web resources for further exploration, and to connect with government and private sector bodies.

Understanding a Changing China - Howard Davies 2017-08-23

As China becomes the world's largest economy, so it becomes important to understand the key issues shaping the country's business environment and the behaviour of Chinese businesspeople. This is difficult because those issues are contested. Is China growing at 3% or 8%? Is the Chinese consumer going to save the world? Are state-owned enterprises national champions or zombies? Have we reached the end of "Cheap China"? Can China innovate? Is business still dominated by personal connections? Are markets or the state in control? Does Chinese culture impede or support organizational effectiveness? Are Chinese dragons at your door? Will the finance and property sectors implode? Is the Chinese model sustainable, or will it end in tears? On all these issues there is ill-informed "noise", and an abundance of partisan interpretations. The purpose of this book, therefore, is to provide an even-handed analysis of the key issues that will shape the threats and opportunities arising from China's

development in the next decade. It cannot resolve the competing claims made. However, it does provide the reader with the ideas and the sources of evidence needed to understand and to make well thought-out judgments as China continues to evolve.

The Korean Economy - You-il Lee 2019-05-01

The Korean Economy: From Growth to Maturity takes an in-depth, amalgamated look at the evolution of Korea's globalization drive from the early 2000s (Kim Dae-jung regime, 1998-2003) to the present period (Park Geun-hye, 2013-2017). The book discusses the role of foreign companies on the sustainability of Korea's economic growth, the relationship between the chaebol and the MNCs, the evolution of Korea's nation brand, and the role of the state in Korea's new economic trajectory (globalization) since the 2000s. With data collected from fieldwork, the book provides both empirical and qualitative insights (economic, socio-cultural and political economic analysis) into the Korean political economy and would be a very useful reference to other emerging economies experiencing similar globalization paths.

Ten Lessons for a Post-Pandemic World - Fareed Zakaria 2020-10-06

New York Times Bestseller COVID-19 is speeding up history, but how? What is the shape of the world to come? Lenin once said, "There are decades when nothing happens and weeks when decades happen." This is one of those times when history has sped up. CNN host and best-

selling author Fareed Zakaria helps readers to understand the nature of a post-pandemic world: the political, social, technological, and economic consequences that may take years to unfold. Written in the form of ten "lessons," covering topics from natural and biological risks to the rise of "digital life" to an emerging bipolar world order, Zakaria helps readers to begin thinking beyond the immediate effects of COVID-19. Ten Lessons for a Post-Pandemic World speaks to past, present, and future, and, while urgent and timely, is sure to become an enduring reflection on life in the early twenty-first century.

Rebound - Kim R. Holmes 2013-11-07

There is a huge concern in America today that the country is in decline, one of the few sentiments that - nationally - our increasingly polarized political leaders can agree on. Americans fear that the economy and our culture itself are in deep crisis. They are also frustrated that the ruling classes are unable to fix America's problems. Kim R. Holmes' Rebound taps into these concerns, taking a fresh look at how America has moved away from the principles and practices that once made it the world's greatest nation. Far from accepting America's inevitable decline, as so many today do, Holmes argues that decline is a choice, not an inevitability or destiny. To restore our culture, revitalize our economy, and ensure we return to being the world's number one power, America must reconnect with its historical DNA: the ingredients of its greatness. This book lays out the vision and roadmap for how America can bounce back, with examples from throughout our nation's history that prove we've always been able to meet the challenges facing us, no matter how largely they may loom.

Compound Containment - Dong Jung Kim 2022-03-07

When does a reigning great power of the international system supplement military containment of a challenging power by restricting its economic exchanges with that state? Scholars of great power politics have traditionally focused on examining a reigning power's military containment of a challenging power. In direct contrast, Compound Containment demonstrates that these conventional studies are flawed without a sound understanding of the multilayered aspects of containment strategy in great power politics. Since economic capacity and military power are intimately linked to one another, countering a challenging power requires addressing both economic and military dimensions. Nonetheless, this nexus of security and economy in a reigning power's response to a challenging power cannot be explained by traditional theories that dominate research in international security. Author Dong Jung Kim fills a gap in the scholarship on great power competition by investigating when a reigning power will make its military containment of a challenging power "compound" by simultaneously employing restrictive economic measures. Its main theoretical claims are corroborated by an analysis of key historical cases of reigning power-challenging power competition. This book also offers policy prescriptions for the United States by examining whether the United States is in a position to complement military containment of China with restrictive economic measures.
