Oh, Oh, Oh! - Idrus 2016-01-01

Idrus's best known collection of stories, "Dari Ave Maria ke Jalan Lain ke Roma," from which most of the stories in this anthology were drawn, was first published in 1948 and has been in print ever since. Idrus wrote about ordinary people distinguished by some odd characteristic, circumstance, or misfortune. He dealt with simple, human themes. With the eye of a journalist, Idrus combined factual reportage - observed first-hand or gained from those on the spot - and fiction based on fact but reworked to heighten their impact and import. "Translated by Ben Anderson, George I Begley, Mark Cammack, Martyn Cove, John M Echols, James S Holmes, Thomas J Hudak, SU Nababan, Hans van Marle, AL Reber, and DW Roskies"

Nick Mount has received numerous awards, including the Bavarian State Prize in Germany, an Australia Council Fellowship, and the Arts SA Triennial Project Grant. Object Oriented - Byron Hawes 2020-03-03
A complete anthology of 25 years of Supreme's accessories, Object Oriented is a never-before-seen comprehensive study of the New York skate brand's ongoing collaborative foray into the world of object design. Noted design critic Byron Hawes traces the history of Supreme's industrial design objects, from cheeky early objects like a skate tool that moonlights as a pipe and a low-key Fuck Tha Police branded tallboy paper bag through to notable collaborations with the likes of Spalding, Louisville Slugger, Everlast, and more, positing a theory that 'Preme's design output is actually a highly curated alt-design museum, proposing an ongoing series of highly important and overlooked quotidian industrial design icons. Examples include a Lezyne bike pump, Master combination locks, Box Logo Buck knives, a Braun alarm clock, Maglites, a Kidde Fire Extinguisher, and the ever controversial brick; design icons all, though not typically mentioned in the same conversation as other iconic pieces of 20th century industrial design. Featuring conversations with noted collectors and designers, as well as original photography of the only known complete collection of Supreme accessories and stickers, Object Oriented is the only complete survey of a cultural phenomenon.

The Early Dated Coins of Europe, 1234- 1500 Robert A. Levinson 2007-01

This is the first book on this fascinating subject since Albert Frey wrote *The Dated European Coinage Prior to 1501* in 1915. Levinson approaches the subject both differently and more thoroughly than Frey. The book focuses on the eight distinct regions in which coins were issued: Germany, Southern Netherlands, Northern Netherlands, Habsburg lands, Switzerland, Scandinavia, Italy, France and organizes the known pre-1501 Anno Domini dated coins chronologically within each region. For the first time, there is for each of the nearly 1200 coins listed (twice as many as in the Frey work), the full legends, descriptions, ruler names, references, weights and rarity. There are nearly 1000 photographs and line drawings, an extraordinary undertaking given the extreme rarity of the majority of the coins. The book is in four parts: the first is a lengthy history of early dated coinage, including discussions of the types, metallurgy, classifications, etc. The second part is the 173 page catalogue of coinage, divided into the eight regions. The third part is a listing, again by region, of all the states issuing early dated coinage, with a history of each states coinage and a cross-reference to all the coins listed in the catalogue. The fourth part contains eight appendices with alphabetical listings, translations of legends, a photographic glossary of coin types, a listing of early dated coinage using Islamic script, and other useful information. Along with the book, at no additional charge, is a loose-leaf price guide.
