Overhaul - Steven Rattner
2010-09-13

A uniquely informed investigative account of one of the biggest financial crises of President Obama's early administration. During his first year in office, President Obama faced the possibility of more than a million lost jobs as GM and Chrysler headed for financial ruin. He joined forces

with Treasury Secretary Tim Geithner and economic advisor Larry Summers in a historic government intervention to keep these two auto-industry giants afloat, working against a ticking clock and fielding vocal opposition from free market champions along the way. It's from this vantage point that former New York Times financial journalist Steven

Rattner witnesses a new administration's grace under pressure in the face of gross corporate mismanagement—a scenario rich in hard-earned lessons for managers and executives in any industry.

Communication, Public Discourse, and Road Safety Campaigns - Nurit Guttman
2014-06-05

This book discusses the use of

communication campaigns to promote road safety, arguing that they need to elicit public discourse on issues pertaining to culture, equity, gender, workplace norms, environmental issues, and social solidarity. Increasingly, new media channels and formats are employed in the dissemination process, making road safety-related messages ubiquitous, and often controversial. Policy makers, educators, researchers, and the public continue to debate the utility and morality of some of the influence tactics employed in these messages, such as the use of graphic images of injury or death, stigmatization (or "blame and shame"), and the use of "black humor." Guttman argues that influencing road safety requires making changes in normative and cultural conceptions of broader issues in society, yet the typical discourse on road safety tends to focus on individual attitudes and practices. The book highlights the importance of social and behavioral theory in communication campaigns on

road safety, and critiques the tendency to focus on individual cognition, affect, and risk conceptions rather than on normative, structural, and cultural factors. The volume positions the discourse on road safety as a social issue, and treats road safety behavior as a social activity that directly relates to other public issues, social values, and social policy, while discussing potential uses of social media and participatory approaches. The discussion turns to the role of road safety communication campaigns as part of a democratic process of eliciting public discourse, including how contemporary society could address broader issues of risk and safety.

Africa's Soft Power -

Oluwaseun Tella 2021-05-23

This book investigates the ways in which soft power is used by African countries to help drive global influence. Selecting four of the countries most associated with soft power across the continent, this book delves into the currencies of soft power across the region:

from South Africa's progressive constitution and expanding multinational corporations, to Nigeria's Nollywood film industry and Technical Aid Corps (TAC) scheme, Kenya's sport diplomacy, fashion and tourism industries, and finally Egypt's Pan-Arabism and its reputation as the cradle of civilisation. The book asks how soft power is wielded by these countries and what constraints and contradictions they encounter. Understandings of soft power have typically been driven by Western scholars, but throughout this book, Oluwaseun Tella aims to Africanise our understanding of soft power, drawing on prominent African philosophies, including Nigeria's Omolúwàbí, South Africa's Ubuntu, Kenya's Harambee, and Egypt's Pharaonism. This book will be of interest to researchers from across political science, international relations, cultural studies, foreign policy and African Studies.
